QUESTION 1

A customer's backup solution performs daily full backups of the environment. The customer is asking for a different solution due to the amount of time it takes on a daily basis. They only need to be able to keep copies of recently changed files to restore if a problem occurs. Full backups will continue to be performed on weekend days, but the customer wants a solution for non-weekend days.

Which backup solution helps accomplish this?

- A. archive and backup
- B. image-based
- C. differential
- D. file-based

Correct Answer: C

QUESTION 2

When planning and designing a backup solution, what is the benefit of the VMware vStorage API for Data Protection (VADP)?

- A. backup efficiency resulting from the deduplication mechanism built into the hypervisor
- B. reduced overhead in the environment
- C. multiple backup targets to offer high-availability
- D. centralized management and consolidated VMware GUI for backup

Correct Answer: B

QUESTION 3

A customer needs a backup solution and offers this information:

?They have a low percentage of daily change in data

?There is a limited backup window during the week

?Quick restores are needed

Which type of backup should you recommend?

- A. full
- B. user defined
- C. differential

D. incremental

Correct Answer: C

QUESTION 4

Which resource should be used to validate support of an HPE MSL 6480 tape library for a specific backup application?

- A. HPE MSL6480 QuickSpecs
- B. HPE Storage Sizing tool +
- C. HPE StoreEver Tape Library Drive Upgrade Matrix
- D. HPE Data Agile BURA Compatibility Matrix

Correct Answer: D

QUESTION 5

When designing a backup solution using the Centralized Server Backup model, what must be considered?

- A. Dedicated SAN backup fabric is required.
- B. LAN performance may be a bottleneck
- C. There may be increased media management difficulties.
- D. There may be a decrease in the number of tape libraries.

Correct Answer: B
