QUESTION 1

A customer's backup solution performs daily full backups of the environment. The customer is asking for a different solution due to the amount of time it takes on a daily basis. They only need to be able to keep copies of recently changed files to restore if a problem occurs. Full backups will continue to be performed on weekend days, but the customer wants a solution for non-weekend days.

Which backup solution helps accomplish this?

- A. archive and backup
- B. image-based
- C. differential
- D. file-based

Correct Answer: C

QUESTION 2

A Customer has a legal requirement to encrypt all of their backup data that goes offsite. The customer has number of sites, each containing a tape libraries are from the same manufacturer, but they all support data encryption. The customer is concerned about losing the encryption keys and the ability to restore their data.

Which solution should you recommend to meet the legal requirement and address the customer's concerns?

- A. HPE Trusted Platform Module
- B. HPE Enterprise Secure Key Manager
- C. hpe Tape Encryption Kit
- D. HPE Data-at-Rest Encryption

Correct Answer: B

QUESTION 3

You are demonstrating to a potential customer how easy it is to replicate data from one HPE 3PAR StoreServ array to another. The demonstration is being done with both arrays connected to a pair of SAN switches. The customer asks what it would take to extend their SAN over very large distances.

What should you recommend they use to accomplish this?

- A. multi-mode replication
- B. wave division multiplexing
- C. FCIP routing

D. low-bandwidth replication

Correct Answer: C

QUESTION 4

A Customer wants to backup their VMware disks, but does not want to use traditional ISV programs to perform this. Which software solution should you recommend?

- A. HPE 3PAR File Persona software
- B. HPE StoreVirtual VSA
- C. HPE StoreOnce Recovery Manager.
- D. HPE 3PAR StoreServ

Correct Answer: C

QUESTION 5

When planning and designing a backup solution, what is the benefit of the VMware vStorage API for Data Protection (VADP)?

- A. backup efficiency resulting from the deduplication mechanism built into the hypervisor
- B. reduced overhead in the environment
- C. multiple backup targets to offer high-availability
- D. centralized management and consolidated VMware GUI for backup

Correct Answer: B
