QUESTION 1

You begin your first presentation to a customer by positioning HPE OneView as a converged management tool. The customer requires the use of the VMware vSphere API for Storage Awareness (VASA) integration in their future management solutions.

Which HPE storage products can be used in your design to support this customer's needs? (Select two.)

- A. HPE ConvergedSystems
- B. HPE StoreEver
- C. HPE StoreVirtual
- D. HPE StoreOnce
- E. HPE 3PAR StoreServ

Correct Answer: CE

QUESTION 2

A customer has a multi-site, 10-node HPE StoreVirtual solution. What should be configured to ensure that application servers connect to storage systems located in the same site to get their data?

- A. Peer Persistence
- B. synchronous replication
- C. DSM MPIO
- D. I/O path preferencing

Correct Answer: D

QUESTION 3

Which information should be collected and analyzed when discovering customer expectations for replication performance? (Select two.)

- A. rate of data change
- B. bandwidth
- C. type of data
- D. latency
- E. frequency of copies

Correct Answer: AD

QUESTION 4

You are working on a multi-site, high availability proposal and are recommending that the customer order two HPE 3PAR StoreServ 8000 systems.

In addition to the two arrays, which additional business value option can you add to the proposal to the CIO?

- A. HPE Rebalance Service to balance workload across sites
- B. HPE 3PAR SW Implementation service and transfer of knowledge
- C. data protection strategy
- D. service and phone home support

Correct Answer: C

QUESTION 5

Which Statement is correct about designing a Flat SAN solution using an HPE 3PAR StoreServ storage system?

- A. Up to four connections/uplinks per enclosure are supported.
- B. The initiator minimum bandwidth setting should be set to 4 Gb.
- C. Up to six connections per Virtual Connect Module are supported.
- D. The initiator peak bandwidth settings should be set to 6 Gb.

Correct Answer: A
