QUESTION 1

You begin your first presentation to a customer by positioning HPE OneView as a converged management tool. The customer requires the use of the VMware vSphere API for Storage Awareness (VASA) integration in their future management solutions.

Which HPE storage products can be used in your design to support this customer's needs? (Select two.)

- A. HPE ConvergedSystems
- B. HPE StoreEver
- C. HPE StoreVirtual
- D. HPE StoreOnce
- E. HPE 3PAR StoreServ

Correct Answer: CE

QUESTION 2

Which object is the unit of failover for HPE 3PAR StoreServ File Persona?

- A. File Provisioning Group
- B. File Share
- C. File Store
- D. Virtual File Server

Correct Answer: D

QUESTION 3

When comparing competitor solutions with your HPE 3PAR StoreServ solution design, which features should you compare?

- A. technology, strengths threats
- B. mesh architecture, ASIC, manageability
- C. cost, complexity, openness
- D. fixed cache, services cost

Correct Answer: B

QUESTION 4

You discuss a backup and recovery strategy with the customer. You notice that the customer is not clear about the differences between backup and archive strategy terms.

? -> remove from product data

? -> set recovery time objective

? -> satisfy compliance requirements

? -> augment with deduplication ? -> periodically overwrite deduplicate copies

Match the term to the appropriate strategy. (Select five.)

- A. archive -> remove from product data
- B. backup -> set recovery time objective
- C. archive -> satisfy compliance requirements
- D. archive -> augment with deduplication
- E. backup -> periodically overwrite deduplicate copies
- F. backup -> remove from product data
- G. archive -> set recovery time objective
- H. backup -> satisfy compliance requirements
- I. backup -> augment with deduplication
- J. archive -> periodically overwrite deduplicate copies

Correct Answer: ABCDE

QUESTION 5

A customer purchased an HPE 3PAR all-flash array to accelerate the company's databases. The customer is concerned about the risk of data loss. Synchronous replication is currently being used, but it is causing slow I/O due to limited network bandwidth and latency, both of which cause application slowdown.

Which alternative solution should you propose to address the issue?

- A. Asynchronous Streaming Remote Copy
- B. Synchronous Long Distance Remote Copy
- C. Periodic Asynchronous Remote Copy
- D. Peer Persistence

Correct Answer: C
