**QUESTION 1**

A customer needs high performance computing (HPC) and a small-scale solution with up to eight processors. The solution should also provide storage in a modular form factor. The customer's HPC application is designed so that some nodes act as compute nodes while others act as storage nodes that serve data to the compute nodes.

Which HPE Apollo system is most appropriate for this situation?

- A. HPE Apollo r2200
- B. HPE Apollo r2800
- C. HPE Apollo 6000
- D. HPE Apollo 8000

Correct Answer: A

---

**QUESTION 2**

What defines lease rate factor (LRF)?

- A. the sum of all costs incurred
- B. the periodic rental payment, expressed as a percentage of equipment cost
- C. the cost of the direct capital expenditure, divided by the expected lifespan of the equipment
- D. the expected time to recover the initial investment

Correct Answer: B

---

**QUESTION 3**

A customer plans to use Insight Control server provisioning and HPE OneView for vCenter Server. The vCenter Server manages one c7000 enclosure with 16 server blades running VMware ESXi. Which licensing option should the architect include in the proposal?

- A. one HPE OneView Standard license for each managed server and one HPE OneView for vCenter Server license for the c7000 enclosure
- B. one Insight Control server provisioning license for each managed server
- C. one Insight Control server provisioning license for each managed server blade and one HPE OneView for vCenter Server license for the entire c7000 enclosure
- D. one HPE OneView Advanced license for each managed server

Correct Answer: C

---

**QUESTION 4**

An architect is planning an HPE Integrity Superdome X solution with the following nPartitions:

nPar 1= Slots 1, 3, and 5 nPar 2 = Slots 2, 4, and 6 The Superdome X solution must connect to a Fibre Channel SAN solution, which provides boot disks for the Superdome X solution.

The architect has selected a FlexibleLOM adapter for each blade. What is a valid plan for additional adapters?

- A. one 2-port FC HBA for slot 1
- B. one 2-port FC HBA each for slot 1, slot 3, and slot 5
- C. one 2-port FC HBA each for slot 1 and slot 2
- D. one 2-port FC HBA each for slot 2, slot 4, and slot 6

Correct Answer: D

---

**QUESTION 5**

A customer plans to purchase some c7000 blade enclosures equipped with Virtual Connect FlexFabric modules to support its development and test team. The customer is concerned about frequent changes to the server blade connectivity. In the initial proposal, an architect included HPE OneView, and now the customer wants to learn how HPE OneView will address their concern.

Which HPE OneView functionality should the architect explain to the customer?

- A. all external connectivity changes will be automatically discovered and server profiles will be automatically updated to reflect the change.
- B. the customer can use different plugins to visualize network and storage connectivity, and change them by using the drag and drop method.
- C. the customer can create profile templates, deploy server profiles from the template, and, if necessary, use the same method to update server connectivity.
- D. the customer can access HPE Virtual Connect Enterprise Manager and perform connectivity changes for all servers in the same Virtual Connect Domain Group.

Correct Answer: B
