QUESTION 1

What is a benefit of using an I/O Accelerator?

- A. increased virtualization performance
- B. optimized for SMB services and workloads
- C. more virtual machines per host server
- D. increased application storage capacity by moving storage closer to the CPU

Correct Answer: A

QUESTION 2

A customer needs to deploy SAP HANA. The customer needs a scale-out solution to accommodate an increase in workload over the next two years.

Which ProLiant series should the architect recommend to the customer?

- A. HPE ProLiant 300
- B. HPE ProLiant 100
- C. HPE ProLiant BladeSystem
- D. HPE ProLiant 500

Correct Answer: D

QUESTION 3

A customer that runs a database server needs high speed access to the database files with a maximum latency of 5 ms.

Which internal disk technology offers the necessary performance?

- A. SATA HDD
- B. SAS HDD
- C. SAS Nearline
- D. PCIe Storage

Correct Answer: B

QUESTION 4

HPE Proliant Gen9 Value	Customer Benefits
accelerate application performance	: 1 million IOPS with 12 Gb/s t Array fast controllers
increased capacity and lower TCO	ices in storage, networking, and plies
move faster with management automation	isioning with software-defined /iew

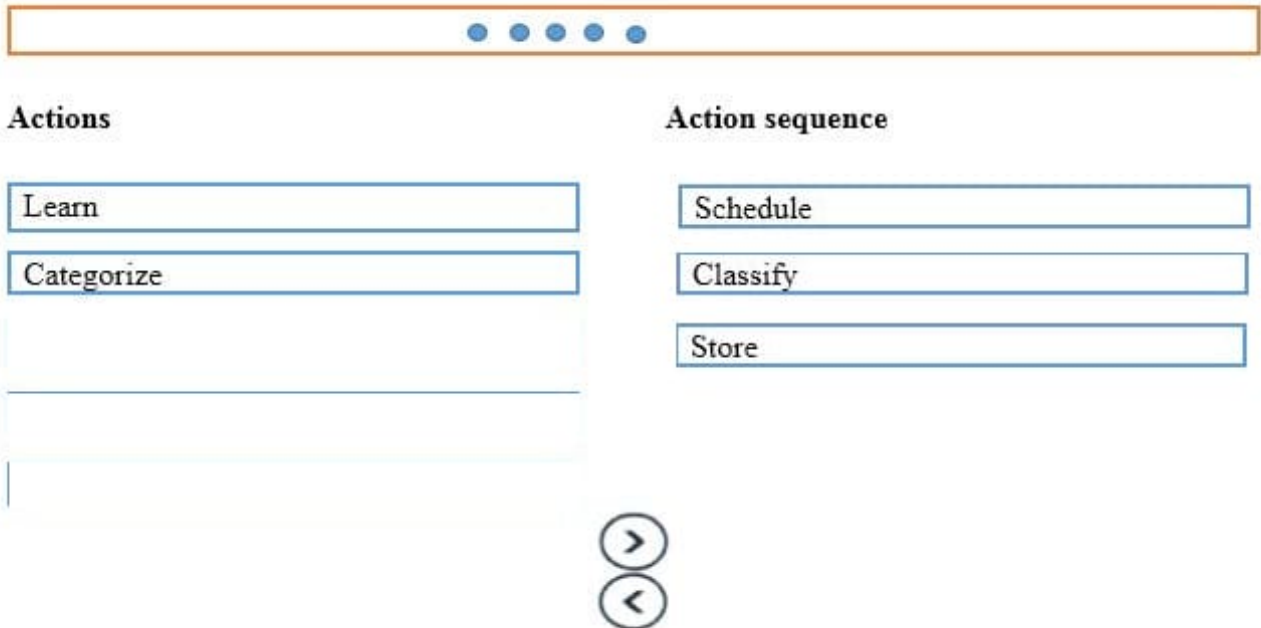

Sort the three sequential steps that are taken for network traffic processing with QoS rules in the correct order by dragging the actions from the left to the action sequence on the right. (Note: Not all actions will apply.) (Select three.)

Select and Place:

● ● ● ● ●

Actions	Action sequence
<div style="border: 1px solid #0070c0; padding: 2px; margin-bottom: 5px;">Learn</div>	
<div style="border: 1px solid #0070c0; padding: 2px; margin-bottom: 5px;">Categorize</div>	
<div style="border: 1px solid #0070c0; padding: 2px; margin-bottom: 5px;">Schedule</div>	
<div style="border: 1px solid #0070c0; padding: 2px; margin-bottom: 5px;">Classify</div>	
<div style="border: 1px solid #0070c0; padding: 2px; margin-bottom: 5px;">Store</div>	
	<div style="display: flex; flex-direction: column; align-items: center; gap: 5px;">><</div>

Correct Answer:

QUESTION 5

A customer has acquired another company with a large install base of HPE BladeSystem servers with Virtual Connect managed by HPE OneView. The customer needs the ability to easily record its new assets in its configuration management database (CMDB).

Which approach should the architect recommend to the customer?

- A. Use VCEM to create a customized report to find all blade servers, and use the results for import into the CMDB.
- B. Back up the HPE OneView appliance database, and use the bulk copy capability of the CMDB to insert the records.
- C. Use the REST API to retrieve a list of server resources and their properties from the HPE OneView appliance for import into the CMDB.
- D. Use iLO Federation groups, and select the multi-system view to gather the hardware types and serial numbers of each server in the group for import into the CMDB.

Correct Answer: C
