QUESTION 5

DRAG DROP

Match the correct redundancy level or use case to the appropriate RAID level.

Select and Place:

RAID Level

RAID 1+0

Use case

two sets of parity data are distributed across all drives

RAID5

the ability to lose up to 50% of available drives

RAID6

protects against the failure of any one drive in the array

RAID50

a maximum of one drive from each of the RAID groups can fail without loss of data

Correct Answer:

RAID Level

RAID6

two sets of parity data are distributed across all drives

RAID 1+0

the ability to lose up to 50% of available drives

RAID5

protects against the failure of any one drive in the array

RAID50

a maximum of one drive from each of the RAID groups can fail without loss of data
