QUESTION 1

A customer contacts you for assistance with performance troubleshooting of their backup environment because over the last few days they notice increasing times for backup completion. They see no apparent reason for this, since the data volume to be backed up did not change unusually compared to the previous days and weeks. You also notice that the deduplication ratio, historically steady at about 20:1, is now gradually declining. Is this a potential cause of the problem? Solution: Ransomware is encrypting data, making the daily incremental backups grow and lowering the deduplication ratio due to new content.
