-  **800,000+** Satisfied Customers

**QUESTION 1**

What Is a correct consideration for creating a Kubernetes Tenant on Ezmeral Container Platform?

- A. When you select that the Tenant owns the Kubernetes namespace, Tenant Admins are given elevated access to the Kubernetes cluster.
- B. When you set a quota for a resource, containers running on the Tenant are not allowed to request or use resources beyond that level.
- C. You must manually create a namespace for the Tenant on the Kubernetes cluster before you create the Tenant.
- D. When you set a quota for a resource, containers running on the Tenant are guaranteed up to that level.

Correct Answer: A

---

**QUESTION 2**

Refer to the exhibit.

You are logged in as a Tenant Admin named "admin 1." You have uploaded a file into the location shown in the exhibit. Now you want to apply that file from the Web Terminal. How do you obtain access to the file in the Web Terminal?

- A. Copy the file to the Web Terminal using the `scp@admin 1 :/TenantShare/apps/` command within the terminal.
- B. Set up a Source Control that references both the Web Terminal and the TenantShare.
- C. Set up a Data Tap between the Web Terminal and the TenantShare/apps directory.
- D. Access the file in the Web Terminal's `"/bd-fs-mnt/TenantShare/apps"` directory.

Correct Answer: C

---

**QUESTION 3**

A customer needs an Ezmeral Container Platform solution for supporting a mix of stateful and stateless applications. The customer also wants the platform to host Ezmeral Data Fabric on Kubernetes.

Which systems are recommended for the Data Fabric workers?

- A. SimpliVity 380s
- B. Synergy 380s
- C. Apollo 4200s
- D. Apollo 6500s

Correct Answer: D

---

**QUESTION 4**

What is one way that HPE Ezmeral Container Platform helps customers to reduce costs?

- A. By making it easy to install bare metal Kubernetes hosts and clusters, it eliminates the costs of many virtualization licenses.
- B. It embeds all control plane functions in the same host systems that run container workers, reducing hardware costs.
- C. It includes its own container orchestration software so that customers do not have to purchase expensive Kubernetes licenses.
- D. It provides a streamlined solution with fewer components than typical DIY Kubernetes, reducing hardware and operational costs.

Correct Answer: C

---

**QUESTION 5**

You have used Ezmeral Container Platform to create a Kubernetes cluster, which has 3 conductor (master) nodes for HA and 12 workers. Which correctly describes how the platform manages this cluster?

- A. The controller elects one conductor as the primary conductor and places the other conductors in standby mode.
- B. The controller places the conductor nodes in standby mode and takes over as the active conductor for the Kubernetes cluster.
- C. The controller sends API requests through the gateway, which load balances them across the conductor nodes.
- D. The controller can manage the cluster, but using HA for the conductors limits a few features such as Data Taps and the Web Terminal.

Correct Answer: A
