-  **800,000+** Satisfied Customers

## QUESTION 1

You are visiting a site configured with IntroSpect, and the on-site admin tells you that they do not think that one of their database servers has fired any alerts for large download or strange access patterns. Could this be a reason? (The database server needs to be listed in an entity whitelist.)

- A. Yes
- B. No

Correct Answer: A

---

## QUESTION 2

While talking to an associate, they ask you to describe how different alerts in IntroSpect indicate compromise on the network. Would this be a correct statement? (When an entity accesses a database for the first time, this would always indicate a compromise.)

- A. Yes
- B. No

Correct Answer: B

---

## QUESTION 3

While investigating alerts in the Analyzer you notice a host desktop with a low risk score has been sending regular emails from an internal account to the same external account. Upon investigation you see that the emails all have attachments. Would this be correct assessment of the situation? (This desktop should be added to a watch list and audited for a time to determine if this is real threat activity.)

- A. Yes
- B. No

Correct Answer: A

---

## QUESTION 4

You were called into a customer site to do an evaluation of installing IntroSpect for a small business. During the discovery process, the customer asks you to explain when they would need to deploy a Packet Processor. Does this explain the function of the Packet Processor? (They always need the Packet Processor to process AMON data from the Aruba Networks Mobility Controller.)

- A. Yes
- B. No

Correct Answer: B

---

## QUESTION 5

You are a security analyst for a company where an Aruba infrastructure, such as Controllers, ClearPass, and Airwave, has been deployed. The company has recently deployed Aruba IntroSpect for security analytics. You are trying to understand the functionality of three components: Analyzer, Compute Node (CN), and Packet Processor of the IntroSpect system. Is this a good description of the functions of the Analyzer Node in the system? (The Analyzer Node is the center of the system, providing all of the control and interface to the other components.)

A. Yes

B. No

Correct Answer: B
