QUESTION 1

What approach doe$ Aruba Edge Service Platform (ESP) take towards IT operations?

A. It simplifies management by taking a one-size-fits all approach in which most settings are non-customizable.

B. It applies machine learning to large data sets to identify issues and recommend fixes or optimizations automatically.

C. It uses a distributed analytics approach in which operators gain visibility into local issues.

D. It relies on expert IT admins who work in specialized teams to manage their segment of the Aruba network.

Correct Answer: A

QUESTION 2

A customer has a data center visualized with VMware.

What is one benefit that the customer receives by adding Aruba Fabric Composer (AFC) to Aruba CX switches?

A. AFC provides a plug-in that makes it simple for IT to provision network connectivity from within VMware vSphere

B. AFC enables AI-division analytics for the Aruba CX switches, helping IT more easily troubleshoot and optimize the switches tor the VMware environment.

C. AFC enables the Aruba CX switches to support Virtual Switching Extension (VSX) for better integration into the VMware environment

D. AFC provides built-in licenses for switch virtualization features such as VXLAN. making it more cost effective for customers to use those features.

Correct Answer: A

QUESTION 3

You are delivering a Managed Connectivity Services (MCS) solution.

What role belongs you, as an Aruba partner, as opposed to Aruba?

A. Upgrading firmware for the solution

B. Managing the solution on an ongoing basis

C. Optimizing the solution on an ongoing basis

D. Designing and deploying the solution

Correct Answer: B

QUESTION 4

What is a key advantage of Aruba Central. as compared to Cisco and Cisco Meraki?

A. Aruba Central provides single-pane-of-glass management for the complete network. while Cisco offers many different product lines with different management tools

B. Aruba Central avoids integration with third-party tools, while Cisco relies heavily on third- party integration to expand its features.

C. Aruba Central offers built-in authentication and policy enforcement, and granular visibility, while Cisco has separate solutions for these features.

D. Aruba Central software uses a perpetual licensing model. while Cisco uses a confusing, subscription-based licensing model

Correct Answer: A

QUESTION 5

You are proposing an Aruba ESP (Edge Services Platform) solution for a customer\\'s campus. The solution includes a Unified Infrastructure with Aruba APs, Aruba gateways, and Aruba CX switches.

The customer asks about the protection that the solution will provide for real-time and mission-critical applications.

What is one key point that you should make?

A. Aruba Central can be deployed as an active-standby cluster at the customer\\'s site to protect applications from downtime.

B. Active/active clustering in gateways and Virtual Switching Extension (VSX) in Aruba CX switches protect these applications from downtime.

C. The customer only needs to be concerned about gateway redundancy, and redundant gateways protect traffic with active-standby operation.

D. Air Slice in Aruba APs and Aruba CX switches provide end-to-end protection for these applications.

Correct Answer: C
