QUESTION 2

Which statement most accurately describes how users with Active Directory credentials authenticate with ClearPass when Active Directory is used as an authentication source for an 802.1x service in ClearPass?

- A. A Kerberos request is sent from the Network Access Device to ClearPass which initiates a RADIUS request to the AD server.
- B. A RADIUS request is sent from the Network Access Device to the AD server which communicates with ClearPass.
- C. An LDAP request is sent from the Network Access Device to the AD server which communicates with ClearPass.
- D. An LDAP request is sent from the Network Access Device to ClearPass which initiates a RADIUS request to the AD server.
- E. A RADIUS request is sent from the Network Access Device to the ClearPass which communicates with the AD server.

Correct Answer: C

Reference http://www.arubanetworks.com/techdocs/ClearPass/Aruba_DeployGd_HTML/Content/3%20Active%20Directory/AD_auth_source_adding.htm

QUESTION 3

What must a network administrator configure on ClearPass to enable RADIUS authentication with a network access device (NAD)? (Choose two.)

- A. An NTP server needs to be set up on the NAD.

- B. The ClearPass server certificate must be installed on the NAD.
- C. A shared secret must be configured on the ClearPass server and NAD.
- D. The ClearPass server must have the network device added as a valid NAD.
- E. A bind username and bind password must be provided.

Correct Answer: CD

QUESTION 4

Which ClearPass feature is used for endpoint compliance and client health status?

- A. Posture
- B. Onboard
- C. Profiling
- D. Captive Portal
- E. RADIUS CoA

Correct Answer: B

QUESTION 5

Customize Guest Registration	
NAS Login Options controlling logging into a NAS for self-registered guests.	
Enabled:	<input checked="" type="checkbox"/> Enable guest login to a Network Access Server
* Vendor Settings:	Aruba Networks Select a predefined group of settings suitable for standard network configurations.
Login Method:	Controller-initiated – Guest browser performs HTTP form submit Select how the user's network login will be handled. Server-initiated logins require the user's MAC address to be available, usually from the captive po
IP Address:	securelogin.arubanetworks.com Enter the IP address or hostname of the vendor's product here.
Secure Login:	Use vendor default Select a security option to apply to the web login process.
Dynamic Address:	<input type="checkbox"/> The controller will send the IP to submit credentials In multi-controller deployments, it is often required to post credentials to different addresses mac The address above will be used whenever the parameter is not available or fails the requirements
Default Destination Options for controlling the destination clients will redirect to after login.	
Default URL:	<input type="text"/> Enter the default URL to redirect clients. Please ensure you prepend "http://" for any external domain.
Override Destination:	<input type="checkbox"/> Force default destination for all clients If selected, the client's default destination will be overridden regardless of its value.
<input type="button" value="Save Changes"/> <input type="button" value="Save and Continue"/>	

Based on the self-registration customization, what is the expected outcome?

- A. When the user connects to an Aruba NAD device, the user will be redirected to this self-registration page.
- B. When the user completes the self-registration form, a NAS login request will be sent from the client to ClearPass alternate domain at securelogin.arubanetworks.com.
- C. When the user browses to securelogin.arubanetworks.com, the user will be redirected to the self-registration page.
- D. User credentials will be sent to the NAD device when the user clicks the login button on the self-registration receipt page.
- E. When the user clicks the register button on the self-registration page, user credentials will be sent to the NAD.

Correct Answer: B
