QUESTION 1

How can an app developer configure campaigns to deliver notifications only on Monday and Tuesday?

- A. Configure the broadcast type as scheduled, and set the recurring schedule date and time.
- B. Configure the broadcast type as always, and set the from and to dates.
- C. Configure the broadcast type as scheduled, and set the from and to dates.
- D. Configure the broadcast type as always.

Correct Answer: A

QUESTION 2

An app developer designs a Meridian-powered app with Aruba location-based services. The app developer wants an initial map of the venue added for the app.

How does the initial map get added?

- A. The Aruba Meridian team adds the initial map in AppMaker
- B. The Aruba Meridian team adds the initial map in the Beacons App
- C. The app developer adds the initial map in AppMaker
- D. The app developer adds the initial map in the Venue app

Correct Answer: B

QUESTION 3

Which Meridian Editor report reveals how many visitors use a Meridian-powered app?

- A. Screen interactions
- B. Total Activity
- C. Visitor interactions
- D. Directions

Correct Answer: B

QUESTION 4

What are the purposes of a node in Meridian routing? (Select two.)

- A. to indicate the exit from a building
- B. to add a placemark to a route
- C. to determine the preferred route
- D. to add portals connecting different floors E. to mark the start and end of a route

Correct Answer: BE

QUESTION 5

A customer has an Aruba Wi-Fi deployment with 20 AP-325s around their 100,000 square foot (9,290.30 square meter) facility. The customer now wants to implement Aruba location services with the use of a venue Meridian app, along with Bluetooth as the technology for positioning.

Which type of information should the network administrator share with the customer to prepare them to meet their goal?

- A. The customer can use their AP-325s as beacons, but may require more battery- powered beacons for an optimized indoor positioning deployment
- B. The customer will not need to purchase any more equipment since they already have AP-325s
- C. The customer will need to purchase USB beacons for management, but otherwise their AP-325s will handle the indoor positioning.
- D. The customer will need to swap out their AP-325 deployment with battery-powered beacons, as they cannot be mixed in a deployment.

Correct Answer: C
