## QUESTION 1

Refer to the exhibit.

Based on the guest Self-Registration with Sponsor Approval workflow shown, at which stage does the sponsor approve the user's request?

- A. After the RADIUS Access-Request
- B. After the NAS login, but before the RADIUS Access-Request
- C. Before the user can submit the registration form
- D. After the RADIUS Access-Response
- E. After the receipt page is displayed, before the NAS login

Correct Answer: E

## QUESTION 2

Which statement is true? (Choose two.)

- A. Mobile device Management is the result of Onboarding.

- B. Third party Mobile Device Management solutions can be integrated with ClearPass.
- C. Mobile Device Management is the authentication that happens before Onboarding.
- D. Mobile Device Management is an application container that is used to provision work applications.
- E. Mobile Device Management is used to control device functions post-Onboarding.

Correct Answer: BE

---

### QUESTION 3

An administrator enabled the Pre-auth check for their guest self-registration. At what stage in the registration process is this check performed?

- A. after the user clicks the login button and after the NAD sends an authentication request
- B. after the user self-registers but before the user logs in
- C. after the user clicks the login button but before the NAD sends an authentication request
- D. when a user is re-authenticating to the network
- E. before the user self-registers

Correct Answer: C

The Onboard template is designed for configuration that allows to perform checks before allowing Onboard provisioning for Bring Your Own Device (BYOD) use-cases. This service creates an Onboard Pre-Auth service to check the user's credentials before starting the device provisioning process. This also creates an authorization service that checks whether a user's device can be provisioned using Onboard.
