## QUESTION 1

A large consumer company is planning to create a community and will require login through the customer's social identity. The following requirements must be met:

1.

The customer should be able to login with any of their social identities, however Salesforce should only have one user per customer.

2.

Once the customer has been identified with a social identity, they should not be required to authorize Salesforce.

3.

The customer's personal details from the social sign-on need to be captured when the customer logs into Salesforce using their social identity.

3. If the customer modifies their personal details in the social site, the changes should be updated in Salesforce.

Which two options allow the Identity Architect to fulfill the requirements?

Choose 2 answers

- A. Use Login Flows to call an authentication registration handler to provision the user before logging the user into the community.
- B. Use authentication providers for social sign-on and use the custom registration handler to insert or update personal details.
- C. Redirect the user to a custom page that allows the user to select an existing social identity for login.
- D. Use the custom registration handler to link social identities to Salesforce identities.

Correct Answer: BD

---

## QUESTION 2

A manufacturer wants to provide registration for an Internet of Things (IoT) device with limited display input or capabilities. Which Salesforce OAuth authorization flow should be used?

- A. OAuth 2.0 JWT Bearer Flow
- B. OAuth 2.0 Device Flow
- C. OAuth 2.0 User-Agent Flow
- D. OAuth 2.0 Asset Token Flow

Correct Answer: B

---

## QUESTION 3

Universal Containers (UC) has decided to use Identity Connect as its identity provider. UC uses Active Directory (AD) and has a team that is very familiar and comfortable with managing AD groups. UC would like to use AD groups to help configure Salesforce users. Which three actions can AD groups control through Identity Connect? Choose 3 answers.

- A. Public Group Assignment
- B. Granting report folder access
- C. Role Assignment
- D. Custom permission assignment
- E. Permission sets assignment

Correct Answer: ACE

---

## QUESTION 4

Universal Containers is building a web application that will connect with the Salesforce API using JWT OAuth Flow.

Which two settings need to be configured in the connect app to support this requirement?

Choose 2 answers.

- A. The Use Digital Signature option in the connected app.
- B. The "web" OAuth scope in the connected app.
- C. The "api" OAuth scope in the connected app.
- D. The "edair\_api" OAuth scope in the connected app.

Correct Answer: AC

---

## QUESTION 5

Northern Trail Outfitters (NTO) has a requirement to ensure all user logins include a single multi-factor authentication (MFA) prompt. Currently, users are allowed the choice to login with a username and password or via single sign-on against NTO's corporate Identity Provider, which includes built-in MFA.

Which configuration will meet this requirement?

- A. Create and assign a permission set to all employees that includes "MFA for User Interface Logins."
- B. Create a custom login flow that enforces MFA and assign it to a permission set. Then assign the permission set to all employees.
- C. Enable "MFA for User Interface Logins" for your organization from Setup -> Identity Verification.
- D. For all employee profiles, set the Session Level Required at Login to High Assurance and add the corporate identity provider to the High Assurance list for the org's Session Security Levels.

Correct Answer: C
