QUESTION 1

Universal Containers has a requirement to query all Account records within Salesforce that were updated in the last 24 hours and download those Accounts to their data warehouse on a nightly basis. They expect the volume of records to be between 500-1500 records per day.

What three techniques should an Architect consider ?

Choose 3 answers

- A. Leverage a time-based workflow action to trigger an account outbound message notification for all records updated within the last 24 hours.
- B. Leverage the Enterprise WSDL getUpdated() operation to retrieve Account records updated within the last 24 hours.
- C. Leverage the Salesforce Data Replication API getUpdated() operation to retrieve Accounts records updated within the last 24 hours.
- D. Leverage a third party tool ETL with a dynamic changing SOQL to retrieve Accounts updated within the last 24 hours.
- E. Leverage the REST API / sObjects / Account / updated URI to retrieve Accounts records updated within the last 24 hours.

Correct Answer: BCD

QUESTION 2

The URL for an external service has been changed without prior notice. The service provides up to date money exchange rates that is accessed several times from Salesforce and is a business critical function for end users. Which two solutions should an Integration Architect recommend be implemented to minimize potential downtime for users in this situation? Choose 2 answers

- A. Named Credentials
- B. Remote Site Settings
- C. Content Security Policies
- D. Enterprise ESB

Correct Answer: AD

QUESTION 3

Universal Containers is planning to sue Bulk API instead of SOAP API to load 1 million activity records from Accounts, Opportunities, and Cases.

Which are two advantages of using Bulk API over SOAP API?

- A. Bulk API needs fewer network round trips to complete the data load.

- B. Bulk API doesn't need a login to Salesforce and can process data offline.
- C. Bulk API doesn't need XML processing and can send data using CSV.
- D. Bulk API needs Partner WSDL, whereas SOAP API needs Enterprise WSDL.

Correct Answer: AC

QUESTION 4

Northern Trail Outfitters (NTO) uses different shipping services for each of the 34 countries it serves. Services are added and removed frequently to optimize shipping times and costs. Sales Representatives serve all NTO customers globally and need to select between valid service(s) for the customer's country and request shipping estimates from that service. Which two solutions should an architect propose? Choose 2 answers

- A. Use Platform Events to construct and publish shipper-specific events.
- B. Invoke middleware service to retrieve valid shipping methods.
- C. Use middleware to abstract the call to the specific shipping services.
- D. Store shipping services in a picklist that is dependent on a country picklist.

Correct Answer: BC

QUESTION 5

An integration architect needs to build a solution that will be using the Streaming API, but the data loss should be minimized, even when the client re-connects every couple of days.

Which two types of Streaming API events should be considered? Choose 2 answers

- A. Generic Events
- B. Change Data Capture Events
- C. PushTopic Events
- D. High Volume Platform Events

Correct Answer: BD
