## QUESTION 1

What sort of security does a Public Key Infrastructure (PKI) offer?

- A. It provides digital certificates which can be used to digitally sign documents. Such signatures irrefutably determine from whom a document was sent.
- B. Having a PKI shows customers that a web-based business is secure.
- C. By providing agreements, procedures and an organization structure, a PKI defines which person or which system belongs to which specific public key.
- D. A PKI ensures that backups of company data are made on a regular basis.

Correct Answer: C

---

## QUESTION 2

Which measure assures that valuable information is not left out available for the taking?

- A. Clear desk policy
- B. Infra-red detection
- C. Access passes

Correct Answer: A

---

## QUESTION 3

You apply for a position in another company and get the job. Along with your contract, you are asked to sign a code of conduct. What is a code of conduct?

- A. A code of conduct specifies how employees are expected to conduct themselves and is the same for all companies.
- B. A code of conduct is a standard part of a labor contract.
- C. A code of conduct differs from company to company and specifies, among other things, the rules of behavior with regard to the usage of information systems.

Correct Answer: C

---

## QUESTION 4

My user profile specifies which network drives I can read and write to. What is the name of the type of logical access management wherein my access and rights are determined centrally?

- A. Discretionary Access Control (DAC)

B. Mandatory Access Control (MAC)

C. Public Key Infrastructure (PKI)

Correct Answer: B

---

## QUESTION 5

You are the owner of a growing company, Speedelivery, which provides courier services. You decide that it is time to draw up a risk analysis for your information system. This includes an inventory of the threats and risks. What is the relation between a threat, risk and risk analysis?

A. A risk analysis identifies threats from the known risks.

B. A risk analysis is used to clarify which threats are relevant and what risks they involve.

C. A risk analysis is used to remove the risk of a threat.

D. Risk analyses help to find a balance between threats and risks.

Correct Answer: B
