QUESTION 1

Which of the following is the MOST robust RAID level with 4 HDDs?

- A. RAID 0
- B. RAID 5
- C. RAID 6
- D. RAID 10

Correct Answer: C

QUESTION 2

Your customer calls you to say that their main server is having problems and no one can do any work at the present. You will have to help troubleshoot over the phone since you were unable to convince your customer to invest in a remote management module at the time of purchase. Which of the following should you do first?

- A. Get a complete problem statement and full system logs.
- B. Swap out all the memory since this is obviously memory related.
- C. Install new hard drives as this is usually the first problem in a hard-working server.
- D. Swap out all the components one by one with known good ones ensuring appropriate ESD precautions are observed.

Correct Answer: A

QUESTION 3

Your customer calls to complain that no virtual machines can be installed in the new server system so the business cannot consolidate their servers using virtualization. How could you answer this question from the list below to be able to successfully install virtual machines?

- A. He must enable Vt-x
- B. He must enable Vt-m
- C. He must enable Vt-d
- D. He must enable Vt-c
- E. He must enable Vt-p

Correct Answer: A

QUESTION 4

A customer needs to submit a server configuration for a government tender. A requirement of the tender is that the system meet the most efficient power supply specification available. Which of the following BEST describes the 80 PLUS efficiency level certification for power supplies?

- A. Bronze, Silver, Gold
- B. Bronze, Silver, Gold, Platinum
- C. Iron, Bronze, Silver, Gold
- D. Iron, Bronze, Silver, Gold, Platinum

Correct Answer: B

QUESTION 5

A customer wishes to run tests on a server to establish a baseline for the disk subsystem performance. Which of the following tools could help the customer to do this? (Select ALL that apply).

- A. Intel® Active System Console
- B. IOmeter
- C. Intel® Raid Controller Command Line Tool 2 (CMDTool2)
- D. Microsoft Windows Resource Monitor
- E. Intel® Server Event Log (SEL) viewer utility

Correct Answer: BD
