QUESTION 1

Which two statements are correct about current data center designs? (Choose two.)

- A. Network functions are being virtualized.
- B. Public IP addresses are easy to obtain but not manage.
- C. There is a proliferation of distributed applications.
- D. There is a proliferation of monolithic applications.

Correct Answer: AC

QUESTION 2

You are asked to provide a data center design proposal. The customer wants each rack to be managed as a single unit with the shortest possible cable lengths.

Which deployment model meets these requirements?

- A. top of rack
- B. middle of rack
- C. middle of row
- D. end of row

Correct Answer: B

QUESTION 3

When considering data center security, which component is often seen as unimportant but is really the first line of defense?

- A. guest access
- B. native VLAN configuration
- C. RBAC
- D. physical security

Correct Answer: A

QUESTION 4

Which two statements about heating and cooling design are correct? (Choose two.)

- A. All devices in a rack should be installed so that the port panels are on the same regardless of the air flow direction.
- B. All devices in a rack should be installed so that the air flow is in the same direction regardless of the port panel location.
- C. In the hot-aisle/cold-aisle design, air enters through vents in the hot-aisle and exists through cold-aisle vents.
- D. The hot-aisle/cold-aisle design maximizes the cooling potential of the air conditioning system.

Correct Answer: CD

QUESTION 5

Which statement is true about highly available data center architectures?

- A. All data center devices require the same level of uptime.
- B. They require the use of a services block for non switching/routing devices.
- C. They are never segmented into zones or PoDs.
- D. During a failure, a data center should gracefully degrade.

Correct Answer: B
