QUESTION 1

You are required to design a university network to meet the conditions shown below.

Users connected to the university network should be able to access the Internet and the research

department lab network.

The research department lab network should not be able to reach the Internet.

Which three actions satisfy the design requirements? (Choose three.)

A. Use a global permit policy for Internet traffic

B. Use a global deny security policy for the research lab

C. Use separate security zones for each department

D. Use the default deny security policy for the research lab

E. Use a static NAT rule between the internal zones for the research lab

Correct Answer: ACD

QUESTION 2

You are concerned about users attacking the publicly accessible servers in your data center through encrypted channels. You want to block these attacks using your SRX Series devices.

In this scenario, which two features should you use? (Choose two.)

A. Sky ATP

B. IPS

C. SSL forward proxy

D. SSL reverse proxy

Correct Answer: BC

QUESTION 3

What is the maximum number of SRX Series devices in a chassis cluster?

A. 2

B. 3

C. 4

D. 5

Correct Answer: A

QUESTION 4

You are deploying Security Director with the logging and reporting functionality for VMs that use SSDs. You expect to have approximately 20,000 events per second of logging in your network.

In this scenario, what is the minimum number of log receiver devices that you should use?

A. 4

B. 3

C. 2

D. 1

Correct Answer: D

QUESTION 5

A hosting company is migrating to cloud-based solutions. Their customers share a physical firewall cluster, subdivided into individual logical firewalls for each customer. Projection data shows that the cloud service will soon deplete all the resources within the physical firewall. As a consultant, you must propose a scalable solution that continues to protect all the cloud customers while still securing the existing physical network.

In this scenario, which solution would you propose?

A. Deploy a vSRX cluster in front of each customer\\'s servers while keeping the physical firewall cluster

B. Deploy a software-defined networking solution

C. Remove the physical firewall cluster and deploy vSRX clusters dedicated to each customer\\'s servers

D. Replace the physical firewall cluster with a higher-performance firewall

Correct Answer: C
