QUESTION 1

Click to the Exhibit button.

```
user@host# show security nat
static {
    rule-set rsl {
        from zone untrust;
        rule rl {
            match {
                destination-address 1.1.1.200/32;
            }
            then {
                static-nat prefix 192.168.1.200/32;
            }
        }
    }
}
proxy-arp {
    interface ge-0/0/0.0 {
        address {
            1.1.1.200/32;
        }
    }
}
```

Referring to the exhibit, what does proxy ARP allow?

- A. the internal network to ARP for the internal address of the server
- B. the external network to ARP for the internal address of the server
- C. the internal network to ARP for the public address of the server
- D. the external network to ARP for the public address of the server

Correct Answer: A

QUESTION 2

Which three elements does AH provide in an IPsec implementation? (Choose three.)

- A. confidentiality
- B. authentication
- C. integrity
- D. availability
- E. replay attack protection

Correct Answer: BCE

QUESTION 3

Which statement is true about Perfect Forward Secrecy (PFS)?

- A. PFS is used to resolve compatibility issues with third-party IPsec peers.
- B. PFS is implemented during Phase 1 of IKE negotiations and decreases the amount of time required for IKE negotiations to complete.
- C. PFS increases security by forcing the peers to perform a second DH exchange during Phase 2.
- D. PFS increases the IPsec VPN encryption key length and uses RSA or DSA certificates.

Correct Answer: C

QUESTION 4

Click the Exhibit button.

You are configuring an OSPF session between two SRX Series devices. The session will not come up.

Referring to the exhibit, which configuration change will solve this problem?

```
[edit]
user@host# show security policies from-zone trust to-zone trust
policy allow-trusted-traffic {
  match {
    source-address any;
    destination-address any;
    application [ junos-http junos-https ];
  }
  then {
    permit;
  }
}
[edit]
user@host# show security zone security-zone trust
host-inbound-traffic {
  system-services {
    all;
  }
}
Interfaces {
  ge-0/0/0.0
  ge-0/0/1.0;
}
[edit]
user@host# show interfaces
ge-0/0/0 {
  unit 0 {
    family inet {
      address 10.0.1.11/24
    }
  }
}
[edit]
user@host# run show ospf neighbor
Address          Interface      State      ID              Pri      Dead
10.0.2.1         ge-0/0/1.0    ExStart   10.0.1.112     128     38
```

- A. Configure a loopback interface and add it to the trust zone.
- B. Configure the host-inbound-traffic protocols ospf parameter in the trust security zone.
- C. Configure the application junos-ospf parameter in the allow-trusted-traffic security policy.
- D. Configure the host-inbound-traffic system-services any-service parameter in the trust security zone.

Correct Answer: A

QUESTION 5

Which UDP port is used in Ipsec tunneling when NAT-T is in use?

- A. 50
- B. 4500
- C. 500
- D. 51

Correct Answer: B
