QUESTION 1

Which statement is true about Perfect Forward Secrecy (PFS)?

A. PFS is used to resolve compatibility issues with third-party IPsec peers.

B. PFS is implemented during Phase 1 of IKE negotiations and decreases the amount of time required for IKE negotiations to complete.

C. PFS increases security by forcing the peers to perform a second DH exchange during Phase 2.

D. PFS increases the IPsec VPN encryption key length and uses RSA or DSA certificates.

Correct Answer: C

QUESTION 2

Which host-inbound-traffic security zone parameter would allow access to the REST API configured to listen on custom TCP port 5080?

A. http

B. all

C. xnm-clear-text

D. any-service

Correct Answer: D

QUESTION 3

After an SRX Series device processes the first packet of a session, how are subsequent packets for the same session processed?

A. They are processed using fast-path processing.

B. They are forwarded to the control plane for deep packet inspection.

C. All packets are processed in the same manner.

D. They are queued on the outbound interface until a matching security policy is found.

Correct Answer: A

QUESTION 4

Click the Exhibit button.

You are trying to create a security policy on your SRX Series device that permits HTTP traffic from your private 172.25.11.0/24 subnet to the Internet. You create a policy named permit ?http between the trust and untrust zones that permits HTTP traffic.

When you issue a commit command to apply the configuration changes, the commit fails with the error shown in the exhibit.

Which two actions would correct the error? (Choose two.)

```
[edit security from-zone trust to-zone untrust]
user@host# show
policy permit-http {
match {
source-address 172.25.11.0/24;
destination-address any;
application http;
      }
      then {
          permit;
      }
}

[edit security policies from-zone trust to-zone untrust]
user@host# commit
[edit security policies from-zone trust to-zone untrust policy
permit-http match application]
  'http'
      application or application-set must be defined
error: commit failed: (statements constraint check failed)
```

A. Create a custom application named http at the [edit applications] hierarchy.

B. Execute the Junos commit full command to override the error and apply the configuration.

C. Modify the security policy to use the built-in junos-http application.

D. Issue the rollback 1 command from the top of the configuration hierarchy and attempt the commit again.

Correct Answer: BC

QUESTION 5

Click the Exhibit button.
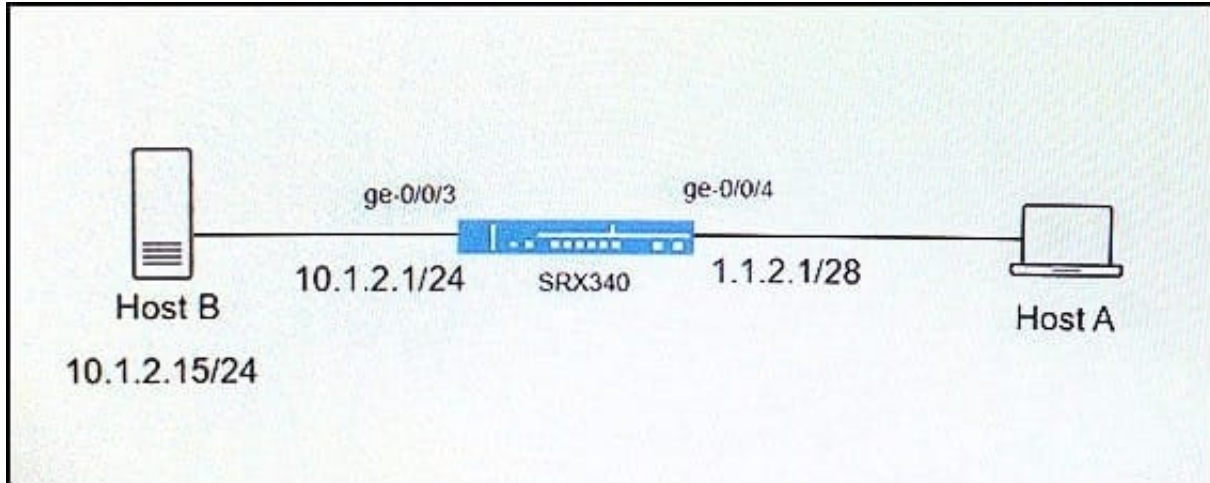

Host A is attempting to connect to Host B using the domain name, which is tied to a public IP address. All attempts to connect to Host B have failed. You have examined the configuration on your SRX340 and determined that a NAT policy is required.

Referring to the exhibit, which two NAT types will allow Host A to connect to Host B? (Choose two.)

A. source NAT

B. NAT-T

C. destination NAT

D. static NAT

Correct Answer: CD
