**QUESTION 1**

Which statement describes the function of NAT?

- A. NAT encrypts transit traffic in a tunnel.
- B. NAT detects various attacks on traffic entering a security device.
- C. NAT translates a public address to a private address.
- D. NAT restricts or permits users individually or in a group.

Correct Answer: C

---

**QUESTION 2**

Click the Exhibit button. Referring to the exhibit, what will happen if client 172.16.128.50 tries to connect to destination 192.168.150.3 using HTTP?

```
[edit]
user@host# show security address-book
global {
    address dmz-net 192.168.150.0/24;
    address client-net 172.16.128.0/24;
    address web-servers 192.168.150.0/29;
}

[edit security policies]
user@host# show
from-zone trust to-zone dmz {
    policy p1 {
        match {
            source-address client-net;
            destination-address dmz-net;
            application [ junos-http junos-https ];
        }
        then {
            permit;
        }
    }
    policy p2 {
        match {
            source-address client-net;
            destination-address web-servers;
            application [junos-http junos-https ];
        }
        then {
            deny;
        }
    }
    policy p3
        match {
            source-address any;
            destination-address any;
            application any;
        }
        then {
            deny;
        }
    }
}
global {
    policy global-policy {
        match {
            source-address any;
            destination-address any;
            application any;
        }
        then {
            permit;
            log {
                session-close;
            }
        }
    }
}
}
```

- A. The client will be permitted by policy p1.
- B. The client will be denied by policy p3.
- C. The client will be denied by policy p2.
- D. The client will be permitted by the global policy.

Correct Answer: D

---

**QUESTION 3**

Which statement is true about functional zones?

- A. Functional zones are a collection of regulated transit network segments.
- B. Functional zones provide a means of distinguishing groups of hosts and their resources from one another.
- C. Functional zones are used for management.
- D. Functional zones are the building blocks for security policies.

Correct Answer: C

---

**QUESTION 4**

Which statement describes the function of screen options?

- A. Screen options encrypt transit traffic in a tunnel.
- B. Screen options protect against various attacks on traffic entering a security device.
- C. Screen options translate a private address to a public address.
- D. Screen options restrict or permit users individually or in a group.

Correct Answer: B

---

**QUESTION 5**

Click the Exhibit button.

```
user@host> show security ike security-associations

user@host> show route 172.16.1.2

inet.0: 8 destinations, 8 routes (8 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both

172.16.1.0/24          *[Static/5] 00:04:21
                       > via st0.0

user@host> ping 172.16.1.2 source 172.16.1.1
PING 172.16.1.2 (172.16.1.2): 56 data bytes
64 bytes from 172.16.1.2: icmp_seq=0 ttl=64 time=3.428 ms
64 bytes from 172.16.1.2: icmp_seq=1 ttl=64 time=1.367 ms
64 bytes from 172.16.1.2: icmp_seq=2 ttl=64 time=1.911 ms
```

You have an IPsec tunnel between two devices. You clear the IKE security associations, but traffic continues to flow across the tunnel.

Referring to the exhibit, which statement is correct in this scenario?

- A. The IPsec security association is independent from the IKE security association
- B. The traffic is no longer encrypted
- C. The IKE security association immediately reestablishes
- D. The traffic is using an alternate path

Correct Answer: AB
