QUESTION 1

You want to restrict role access to only users who have the required client certificate and pass a Host Checker policy. Which two methods in the Admin UI would set this restriction? (Choose two.)

A. Enable the Host Checker and certificate role restrictions.

B. Require and enforce the Host Checker and certificate authentication policies.

C. Use a custom expression to map users to the role based on the client certificate and Host Checker policy.

D. Use Secure Virtual Workspace to restrict access to the role based on the client certificate and Host Checker policy.

Correct Answer: AC

QUESTION 2

Which three elements are required to deploy the Service Provider Edition (SPE) virtual appliance? (Choose three.)

A. a MAG Series device acting as license server

B. user subscription licensing

C. a server that hosts the virtual appliances

D. LDAP authentication

E. Device Management Interface (DMI)

Correct Answer: ABC

QUESTION 3

You are asked to configure enterprise Web services access.

In the Admin UI, which two Web role actions apply? (Choose two.)

A. Add bookmarks.

B. Allow automount shares.

C. Auto-launch Secure Application Manager.

D. Mask host names while browsing.

Correct Answer: AD

QUESTION 4

You are asked to add another gateway to an existing three-unit SA cluster. Which two actions should you perform? (Choose two.)

A. Add a new cluster member, IP addresses, and default gateways under the existing cluster definition.

B. Upgrade the new cluster member to match the same software release of the cluster.

C. Set the existing cluster to active/passive state.

D. Configure cluster name, cluster password, and existing member address on the new cluster member.

Correct Answer: AD

QUESTION 5

You are currently the administrator of a network which provisions secure remote access using the Junos Pulse Secure Access Service in an active/passive cluster. You want to upgrade both units in the cluster to Software Release 7.2. You want to ensure that secure remote access is maintained during the upgrade.

Which feature addresses this concern?

A. Central Manager

B. CL license

C. IP address takeover (IPAT)

D. virtual IP (VIP)

Correct Answer: A
