Correct Answer: D

---

### QUESTION 3

What are two components of the JUNOS software architecture? (Choose two.)

- A. efficient processing of all packets through the control plane
- B. shared memory environment for all processes
- C. multiple software processes
- D. separation of control and forwarding planes

Correct Answer: CD

---

### QUESTION 4

Which statement is correct about the single-secure mode of 802.1X?

- A. It allows any one supplicant on the interface to be authenticated; once authentication is successful, only the successfully authenticated supplicant is allowed access at one time.

- B. It allows any number of supplicants on the interface to be authenticated; only supplicants with their own successful authentication are allowed access at the same time.
- C. It allows any one supplicant on the interface to be authenticated; once authentication is successful, any other devices on the same interface will gain access.
- D. It does not require any supplicant on the interface; no supplicant is able to gain access.

Correct Answer: A

---

#### QUESTION 5

Which statement regarding network ports on EX 3200 switches is correct?

- A. If the 4-port 1-Gigabit Ethernet uplink module is installed, the last four built-in network ports are not usable.
- B. EX 3200 switches support 12, 24, or 48 built-in network ports depending on the switch model.
- C. If the 2-port 10-Gigabit Ethernet uplink module is installed, the last two built-in network ports are not usable.
- D. EX 3200 switches support copper or fiber network ports, depending on the switch model.

Correct Answer: A
