QUESTION 1

Click the Exhibit button.

An EX-series switch is configured as shown in the exhibit. A network outage has caused the RADIUS server and the TACACS+ server to become unreachable.

If a user attempts to login to the switch during this outage, which statement is correct?

```
[edit system]
lab3s1# show
authentication-order [ radius tacplus ] ;
```

- A. The user would be required to login with the root user account.
- B. The user would be required to access the switch through the console connection.
- C. The authentication fails because there is no valid authentication method.
- D. The authentication is performed using the local password database.

Correct Answer: D
