QUESTION 1

A local user complains that they cannot connect to an FTP server on the DMZ network. You investigate and confirm that the security policy allows FTP traffic from the trust zone to the DMZ zone.

What are two reasons for this problem? (Choose two.)

- A. The FTP server has no route back to the local network.
- B. No route is configured to the DMZ network.
- C. No security policy exists for traffic from the DMZ zone to the trust zone.
- D. The FTP ALG is disabled.

Correct Answer: AD

QUESTION 2

You are using the AppDoS feature to control against malicious bot client attacks. The bot clients are using file downloads to attack your server farm. You have configured a context value rate of 10,000 hits in 60 seconds. At which threshold will the bot clients no longer be classified as malicious?

- A. 5000 hits in 60 seconds
- B. 8000 hits in 60 seconds
- C. 7500 hits in 60 seconds
- D. 9999 hits in 60 seconds

Correct Answer: B

QUESTION 3

Your company's network has seen an increase in Facebook-related traffic. You have been asked to restrict the amount of Facebook-related traffic to less than 100 Mbps regardless of congestion. What are three components used to accomplish this task? (Choose three.)

- A. IDP policy
- B. application traffic control
- C. application firewall
- D. security policy
- E. application signature

Correct Answer: BDE

QUESTION 4

You are asked to implement IPsec tunnels between your SRX devices located at various locations. You will use the public key infrastructure (PKI) to verify the identification of the endpoints. What are two certificate enrollment options available for this deployment? (Choose two.)

- A. Manually generating a PKCS10 request and submitting it to an authorized CA.
- B. Dynamically generating and sending a certificate request to an authorized CA using OCSP.
- C. Manually generating a CRL request and submitting that request to an authorized CA.
- D. Dynamically generating and sending a certificate request to an authorized CA using SCEP.

Correct Answer: AD

QUESTION 5

You are asked to secure your company's Web presence. This includes using an SRX Series device to inspect SSL traffic going to the Web servers in your DMZ.

Which two actions are required to accomplish this task? (Choose two.)

- A. Load your Web server's private key in the IDP configuration.
- B. Load your Web server's public key in the IDP configuration.
- C. Generate a root certificate on the SRX Series device for your Web servers.
- D. Specify the number of sessions in the SSL sensor configuration.

Correct Answer: AD
