QUESTION 1

You have an existing group VPN established in your internal network using the group-id 1. You have been asked to configure a second group using the group-id 2. You must ensure that the key server for group 1 participates in group 2 but is not the key server for that group. Which statement is correct regarding the group configuration on the current key server for group 1?

A. You must configure both groups at the [edit security ipsec vpn] hierarchy.

B. You must configure both groups at the [edit security group-vpn member] hierarchy.

C. You must configure both groups at the [edit security ike] hierarchy.

D. You must configure both groups at the [edit security group-vpn] hierarchy.

Correct Answer: D

QUESTION 2

Which QoS function is supported in transparent mode?

A. 802.1p

B. DSCP

C. IP precedence

D. MPLS EXP

Correct Answer: A

QUESTION 3

Click the Exhibit button

[edit security] user@host# show policies global {

 policy new-policy {

 match { source-address any; destination-address any; application junos-https;

 } then { permit { application-services { application-firewall {

rule-set appfw; } } } } } }

[edit security]

user@host# show application-firewall

rule-sets appfw {

rule 1 {

match {

dynamic-application junos:SSL;

}

then {

permit;

}

}

rule 2 {

match {

dynamic-application junos:HTTP;

}

then {

reject;

}

}

default-rule {

permit; } }

Referring to the exhibit, which two statements are correct? (Choose two.)

A. HTTP traffic is permitted.

B. HTTP traffic is dropped.

C. HTTPS traffic is permitted.

D. HTTPS traffic is dropped.

Correct Answer: BC

QUESTION 4

You are attempting to establish an IPsec VPN between two SRX devices. However, there is another

device between the SRX devices that does not pass traffic that is using UDP port 4500.

How would you resolve this problem?

A. Enable NAT-T.

B. Disable NAT-T.

C. Disable PAT.

D. Enable PAT.

Correct Answer: B

QUESTION 5

You are asked to implement an IPsec VPN between your main office and a new remote office. The remote office receives its IKE gateway address from their ISP dynamically.

Regarding this scenario, which statement is correct?

A. Configure a fully qualified domain name (FQDN) as the IKE identity.

B. Configure the dynamic-host-address option as the IKE identity.

C. Configure the unnumbered option as the IKE identity.

D. Configure a dynamic host configuration name (DHCN) as the IKE identity.

Correct Answer: A
