**QUESTION 1**

Which Junos security feature is used for signature-based attack prevention?

A. RADIUS

B. AppQoS

C. IPS

D. PIM

Correct Answer: C

**QUESTION 2**

You must implement an IPsec VPN on an SRX Series device using PKI certificates for authentication. As

part of the implementation, you are required to ensure that the certificate submission, renewal, and

retrieval processes are handled automatically from the certificate authority.

In this scenario, which statement is correct.

A. You can use CRL to accomplish this behavior.

B. You can use SCEP to accomplish this behavior.

C. You can use OCSP to accomplish this behavior.

D. You can use SPKI to accomplish this behavior.

Correct Answer: B

Certificate Renewal The renewal of certificates is much the same as initial certificate enrollment except you are just replacing an old certificate (about to expire) on the VPN device with a new certificate. As with the initial certificate request, only manual renewal is supported. SCEP can be used to re-enroll local certificates automatically before they expire. Refer to Appendix D for more details.

**QUESTION 3**

Which three type of peer devices are supported for Cos-Based IPsec VPN?

A. High-end SRX Series device

B. cSRX

C. vSRX

D. Branch-end SRX Series devics

Correct Answer: ACD

**QUESTION 4**

```

Referring to the exhibit, which two statements are true? (Choose two.)

A. The SRX Series device is enrolled and communicating with a JATP Appliance

B. The JATP Appliance cannot download the security feeds from the GSS servers

C. The SRX Series device cannot download the security feeds from the JATP Appliance

D. The SRX Series device is not enrolled but can communicate with the JATP Appliance

Correct Answer: CD

**QUESTION 5**
