### QUESTION 1

Usha has developed a JSR-286 compliant portlet. She wants to use it on a WSRP producer so that it can be consumed by a remote portal server. What changes if any should be made?

- A. She must set the enable WSRP portlet initialization parameter to true in the portlet.xml file.
- B. She should change her portlet class to implement ServiceDescription and Markup interface.
- C. She does not have to make any changes.
- D. She should change her portlet class to implement ServiceDescription, Markup, Registration and PortletManagement interface.

Correct Answer: C

---

### QUESTION 2

Which of the following options is an advantage of using JSR 286 events over public render parameters or application\_scope session attributes?

- A. A user can bookmark the URL with the event information.
- B. Objects can only be shared between portlets in the same application.
- C. Complex object types can be shared across web applications.
- D. Using events over public render parameters avoids the additional process event call.

Correct Answer: C

---

### QUESTION 3

Which of the following options best describes the JSR 286 portlet-request types, for which you can collect average response times using the Performance Monitoring Infrastructure (PMI) portlet?

- A. Render, Action, Resource, Event
- B. Render, Action
- C. Render, Action, Resource
- D. Render, Resource

Correct Answer: A

---

### QUESTION 4

Which of the following statements is correct regarding the use of Dojo with theme and portlet development?

- A. Widgets are free to attach events to global elements, such as a document, window, or body.
- B. The Dojo parser is automatically executed in portlets using Dojo widgets.
- C. Widgets are automatically disconnected from all of their event handlers during the destroy method.
- D. Dojo can be loaded only once per namespace. You can load more than one version of Dojo in the page by using the Dojo native support for scopes.

Correct Answer: D

---

#### QUESTION 5

Which of the following options is false regarding doctypes in OneUI?

- A. Markup should be written such that if it was included in a page that uses an XHTML doctype, it would still work and would not fail.
- B. The browser must run in standards mode (and not quirks mode).
- C. Consumers must use an XHTML transitional doctype, because the markup uses XHTML capabilities.
- D. It should be the responsibility of each consumer of this markup and CSS to determine which doctype (or multiple doctypes) they support.

Correct Answer: C
