-  **800,000+** Satisfied Customers

### QUESTION 1

Roberto has been asked to modify the Membership view in the Video Rental application. A green checkmark should appear in the Approved view column for each document where membership has been approved. He set the view column property to "Display values as icons", and now he needs to write a column formula. What is the column formula he needs to use?

- A. @If(Approved = "Yes"; 82; 0)
- B. @If(Approved = "Yes"; @OpenImageResource("checkmark.gif"); "")
- C. @If(Approved = "Yes"; @Icon(82); @Icon(0))
- D. @If(Approved = "Yes"; @Column(82); @Column(0))

Correct Answer: A

---

### QUESTION 2

Susan wants to populate a field in the Inventory form so that when a user composes a document they can select from a dialog list of products. Which @function can she use to look up to an Inventory view within the same database?

- A. @DbName
- B. @DbTitle
- C. @DbLookup
- D. @DbColumn

Correct Answer: D

---

### QUESTION 3

Marcello wants to create a custom startup page for his customer database, using different buttons and values from profile and normal documents. How can he achieve this?

- A. Create an outline with calculated entries, and display this directly through a frameset.
- B. Create a view with custom actions that calculate what actions the user might want to take.
- C. Create a page with calculated text and actions, and display this using a frameset. Create a frameset, and display that page with dynamic text.
- D. Create a form and use action buttons, only calculated for display fields and computed text to display all available options to this specific user. Set the database properties to start with a doclink in the about database document to any document created with this form.

Correct Answer: D

---

#### QUESTION 4

Jarrod wrote an agent that begins with the following LotusScript code: Dim session As New NotesSession Dim db As NotesDatabase Dim view As NotesView Dim doc As NotesDocument Set db = session.CurrentDatabase Set view = db.GetView( "By Category" ) Set doc = view.GetDocumentByKey( "kitten" ) When the agent runs, which document will be referenced by the "doc" variable?

- A. The first document in the By Category view that contains the word "kitten" in any field
- B. The first document in the By Category view that has a value of "kitten" in the first sorted column
- C. The first document in the By Category view that has any value in the column with an alias of "kitten"
- D. If the database is full-text indexed, the first document in the By Category view that contains the word "kitten" in any field. If the database is not full-text indexed, the "doc" variable will be empty.

Correct Answer: B

---

#### QUESTION 5

Minh supports the Change Control database. He has been asked if he can change the "by Month" Calendar view so that the days that are outside of the selected month are displayed with a light gray background and dark gray text. What can Minh do to address this request?

- A. Modify the "Monthly" option on the View properties Styles tab. Select a light gray color for the "Not current" color, and select a dark gray color for the Text color.
- B. Modify the "Date Area" option on the View properties Styles tab. Select a light gray background and set the Text color to dark gray. Modify the colors for background and text in the Current option area to differentiate the gray scheme.
- C. This request cannot be met completely, but Minh can set the Body Background color for the entire view on the View properties Styles tab. He can then control the Text colors by creating a hidden column set to "Use value as color", and by coding a column value formula to evaluate to RGB values.
- D. Create a hidden column immediately before the StartDate column in the view. Select the "Use value as color" option. Code a formula to evaluate to one set of RGB values for Background and Text if the date is in the current month, and a different set of RGB values for dates outside the current month.

Correct Answer: A
