Correct Answer: A

QUESTION 4

A block named newsletter is already defined in the layout XML, as in the example shown below. The page on which the block is visible has a three-column layout. How can you move the block from the left column to the right column?

```
EXAMPLE:
<default>
    <reference name="left">
        <block type="newsletter/subscribe" name="newsletter"
            template="newsletter/subscribe.phtml"/>
    </reference>
</default>

A. <default>
        <reference name="left">
            <remove name="left.newsletter" />
        </reference>
        <reference name="right">
            <action method="insert">
                <block>newsletter</block>
            </action>
        </reference>
    </default>

B. <default>
        <reference name="left">
            <action method="unsetChild"><name>newsletter</name></action>
        </reference>
        <reference name="right">
            <action method="insert">
                <block>newsletter</block>
            </action>
        </reference>
    </default>

C. <default>
        <reference name="right">
            <action method="insert">
                <block>newsletter</block>
            </action>
        </reference>
    </default>

D. <default>
        <reference name="left">
            <action method="unsetChild"><name>newsletter</name></action>
        </reference>
    </default>
```

A. Option A
