## QUESTION 1

You are managing a project to launch a new Magento instance to target customers in the UK Spain and Finance. Customer will access the sites with different top-level domain names, such as oo.uk.es and f. All websites must be localized.

Products will use prices in EUR or GBP depending on the country.

UK uses a local carrier for delivery while Spain and France use a global carrier.

What is the minimum number of combination to configure this project?

- A. One website, three stores, three store views
- B. One website, one store, three store views
- C. Three websites, three stores, three store views
- D. Two website, two stores, three store views

Correct Answer: B

---

## QUESTION 2

A merchant is creating two websites targeting different region on a single Magento instance. They have a warehouse and several retail stores in each region. They need each website to track inventory.

The available inventory on each website should be the sum of each products quality in the warehouse and any retail stores located in the websites target region.

How do you configure this in Magento?

- A. Change the scope of the Stock attribute from Global to website calculate the stock value for each
- B. Product per Website and save the inventory value at the appropriate Website scope
- C. Create inventory Sources for each warehouse and retain store, create Stocks for each website from the appropriate Sources, and define the Sources and quantities for each Product.
- D. Create an inventory Source for each Website create Stocks for each product, assign the Stocks to the appropriate Sources, and define the stock quantities for each Product.
- E. Copy all of the products, assign a copy to each Website, calculate the stock value for each Product per Website, and save it to the appropriate copy of the Product.

Correct Answer: B

---

## QUESTION 3

You have a customer with more than 5 million products and 2500 attributes. They are using an external system to push products to specific ecommerce sites. They would like to push 500,00 product to their Magento and these products

include 900 attributes. 200 of which are text fields.

In addition to enabling flat catalog, which solution do you choose to meet their requirement?

- A. Convert the text field attributes to dropdowns or combine to description fields
- B. Use Magento websites to direct traffic to specific stores
- C. Ask the client to only use 250,000 SKUs along with new attribute sets
- D. Convert attribute types to use a custom extension

Correct Answer: D

---

#### QUESTION 4

A merchant has set the visibility of a configurable product to Not Visible individually and their variants to Catalog, Search.

How is the product family displayed on the product listing page?

- A. Only the simple products will display but each will have a unique product detail page
- B. The configurable and simple products will display individually but each will have a unique product detail page
- C. Only the simple products will display but will share the same product detail-page as the configurable product
- D. The configurable and simple products will display individually but each will have the same product detail page

Correct Answer: D

---

#### QUESTION 5

Your merchant is migrating from another to Magento. On the old site page exists in two languages, which is reflected in their URL path.

Before going live redirects from old pages to their equivalent new ones need to be configured.

How do you do that in the Magento admin?

- A. Create a category for each old page with a matching URL key
- B. Create a URL rewrite for each old page with a matching Request path
- C. Upload a CSV file with a rewrites-table in the store configuration
- D. Create a CMS page for each old page with a matching identifier

Correct Answer: A
