QUESTION 1

You are reviewing a third party extension for Magento Commerce Cloud compatibility.

Which pattern makes a module incompatible with Magento Commerce Cloud?

- A. Direct instantiation by the ObjectManager of non-generated classes in .phtml template files
- B. Direct instantiation by the ObjectManager in non-constructor methods with the class also being referenced in the constructor signature
- C. Configuration referencing generated Proxy classes in the modules etc/frontend/di.xml file
- D. Direct instantiation of generated classes by the ObjectManager without the class being referenced in the constructor

Correct Answer: B

QUESTION 2

You are updating a Magento Commerce Cloud project from version 2.2.5 to 2.3.0 with the command

```
composer require magento/product-enterprise-edition:2.3.0
```

However, composer is unable to complete the task because the installed version of magento/magentocloud-metapackage is not compatible.

How do you upgrade Magento to the desired version?

- A. Create a new project based on magento/project-enterprise-edition:2.3.0, then add ece-tools, custom modules and themes again with composer and migrate the data
- B. Run `composer require magento/magento-cloud-metapackage:">=2.3.0"`
