QUESTION 1

You fixed an issue in a third-party extension using a patch named `m2-hotfixes/extension-fix.patch`.

Before committing the patch to the repository you want to test it locally.

How do you test a patch in a clean working copy?

- A. Commit the patch because the pre-commit hook will abort the commit if any hotfix causes an issue
- B. Run the command `git apply m2-hotfixes/extension-fix.patch`
- C. Run the command `bin/magento setup:hotfix:apply --patch=m2-hotfixes/extension-fix.patch`
- D. Configure a deploy hook in `.magento.app.yaml` that executes `vendor/bin/ece-tools hotfix:apply --dry-run`

Correct Answer: B

Reference: <https://devdocs.magento.com/cloud/project/project-patch.html>

QUESTION 2

You want to improve the ability to monitor Production deployments by setting up an email notification system.

How do you achieve this?

- A. Enable Deployment Notifications under Configure Environment > Settings in the Project Web UI
- B. Build a custom module which hooks into the deployment phase and sends emails in real-time
- C. Configure log notifications in the `.magento.env.yaml` file
- D. Use the `magento-cloud environment:deploy:email` command to enable email notifications

Correct Answer: C

Reference: <https://devdocs.magento.com/cloud/env/setup-notifications.html>

QUESTION 3

Your client is expecting a five-day sale where the traffic will approximately double. Your instance is consuming all available resources on all three nodes so upscaling one level is appropriate.

How many upsize days will this event use?

- A. Five
- B. Eight
- C. Ten

D. Fifteen

Correct Answer: A

QUESTION 4

You are working with a new developer who needs to be able to deploy code and view logs on Magento Commerce Cloud.

What must you do to give them access?

- A. In the `.magento.app.yaml` file, add their email under Users. They need to enter their SSH public key.
- B. Add their SSH public key to a file named `.ssh/authorized_keys` and deploy the change.
- C. In the Cloud Project Web UI, click Add User to add their email. They need to enter their SSH public key.
- D. Add a Magento admin user for them and paste the SSH public key into their user's SSH Key field, which is available only on Magento Commerce Cloud.

Correct Answer: B

Reference: <https://devdocs.magento.com/cloud/before/before-workspace-ssh.html>

QUESTION 5

You are debugging an issue with an extension that only occurs in Production. The extension writes relevant information using the debug log level.

However, that specific information is not getting written to the logs on Production.

How do you fix this?

- A. Enable developer mode in Production for a short period to gather the required information
- B. Write a custom logger that writes the debug information to `var/log/custom.log`
- C. Enable debug logging in `app/etc/config.php` locally and deploy it to Production
- D. Enable debug logging in the Admin interface in Production

Correct Answer: D

Reference: <https://devdocs.magento.com/guides/v2.3/config-guide/cli/logging.html>
