QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 for Finance and Operations security administrator.

When testing security setups, users report that certain roles are gaining access to sensitive information via a form in the system.

You must investigate which user roles have what visibility and access level to system objects, and then send a report to the implementation team to address security compliance concerns.

You need to report the information from the system.

Solution: Generate the User role assignments report.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

You need to ensure that Liberty\\'s can use the business processes from Contoso, Ltd. What should you do?

A. Import the specific BPM library into the appropriate sub-node as a child.

B. Create a reference to the BPM library into the appropriate sub-node as a sibling.

C. Create a reference to the BPM library into the appropriate sub-node as a child.

D. Import the specific BPM library into the appropriate sub-node as a sibling.

Correct Answer: A

QUESTION 3

HOTSPOT

You support custom functionality in Dynamics 365 Finance.

Your company requires that all solutions be fully tested before they are deployed to production.

You need to use different testing types prior to deployments.

Which testing type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Testing type
Isolate and test new features individually.	Unit / Regression / Functional / End to end
Test whether new features break existing capabilities.	Unit / Regression / Functional / End to end
Validate that multiple new features meet requirements.	Unit / Regression / Functional / End to end
Test all components of the solution together.	Unit / Regression / Functional / End to end

Correct Answer:

Answer Area

Requirement	Testing type
Isolate and test new features individually.	**Unit** / Regression / Functional / End to end
Test whether new features break existing capabilities.	Unit / **Regression** / Functional / End to end
Validate that multiple new features meet requirements.	Unit / Regression / **Functional** / End to end
Test all components of the solution together.	Unit / Regression / Functional / **End to end**

Box 1: Unit

Unit testing is a software development process in which the smallest testable parts of an application, called units, are individually and independently scrutinized for proper operation. This testing methodology is done during the development

process by the software developers and sometimes QA staff.

Box 2: Regression

What is regression testing?

Image result for Dynamics 365 what is regression testing Regression testing is a software testing practice that ensures an application still functions as expected after any code changes, updates, or improvements. Regression testing is

responsible for the overall stability and functionality of the existing features.

Box 3: Functional

FUNCTIONAL TESTING is a type of software testing that validates the software system against the functional requirements/specifications.

Box 4: End to End

End-to-end testing is a methodology that assesses the working order of a complex product in a start-to-finish process. End-to-end testing verifies that all components of a system are able to run and perform optimally under real-world

scenarios.

QUESTION 4

DRAG DROP

A company is migrating to Dynamics 365 Finance from a legacy system. The company is creating new questionnaires for customers.

When the survey responses come in, the company wants to provide ratings as a foundation for a further discussion.

You set up questionnaire types, question types, and questionnaire parameters.

You need to design the questionnaire.

In which order should you perform the actions? To answer, move all actions to the answer area and arrange them in the correct order.
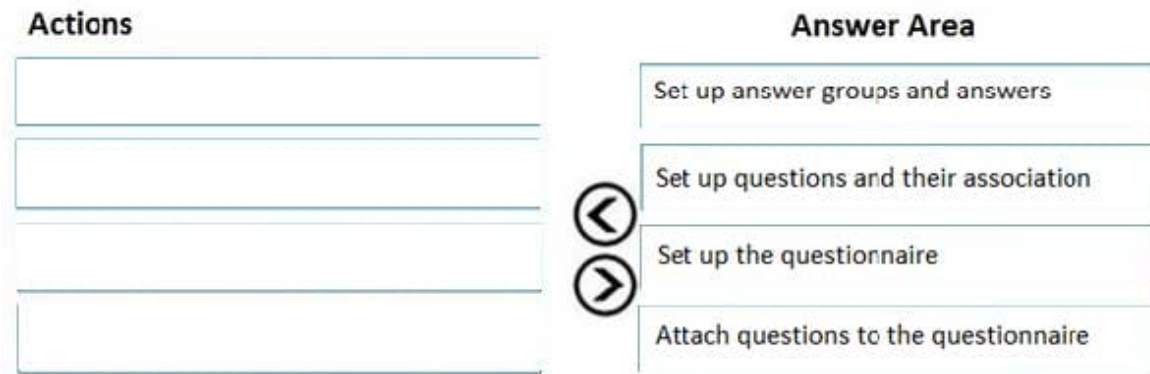

Select and Place:

Correct Answer:

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 Finance system administrator. You have a test environment that is used by several people at any given time.

You create a new data entity in your development and migrate the code to the test environment. In the test environment, you are unable to find the data entity in the list.

You need to locate the data entity.

Solution: Reopen the client browser.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B
