QUESTION 1

A client plans to implement Dynamics 365 Finance.

The client is unsure whether to use a cloud-based or on-premises implementation. For which scenario should the client install the on-premises version of the app?

- A. The client needs to comply with data sovereignty rules in a region where Microsoft Azure Data Centers are limited.
- B. The client wants direct access to production environments.
- C. The client has integrations that depend on direct Microsoft SQL access.
- D. The client already has a significant infrastructure investment.

Correct Answer: D

QUESTION 2

DRAG DROP

You need to determine which system functionality meets the business requirement.

What should you recommend? To answer, drag the appropriate functionalities to the correct requirements.

Each functionality may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Select and Place:

Workflow

Purchasing policy

Audit policy

Approve purchase requisitions over \$50.

Functionality

Review offsite travel expenses.

Functionality

Enforce vendor invoice compliance.

Functionality

Correct Answer:

<input type="text"/>	Approve purchase requisitions over \$50.	<input type="checkbox"/>
<input type="text"/>	Review offsite travel expenses.	<input type="checkbox"/>
<input type="text"/>	Enforce vendor invoice compliance.	<input type="checkbox"/>

QUESTION 3

HOTSPOT

A company implements Dynamics 365 Finance.

A sales order confirmation report does not meet the company's branding standards. The report must include header notes and a colorful logo.

You must enable modern design for additional reports created by users in the future.

You need to meet the branding standards and enable additional forms and reports to be created by users.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement

Solution

Add colorful logo and header notes.

Modern reports branding details
Print management configuration
Business document management

Enable forms by users.

Modern reports branding details
SQL Server Reporting Services (SSRS) report design
Print management configuration
Business document management

Correct Answer:

Requirement

Solution

Add colorful logo and header notes.

Modern reports branding details
Print management configuration
Business document management

Enable forms by users.

Modern reports branding details
SQL Server Reporting Services (SSRS) report design
Print management configuration
Business document management

Box 1: Modern reports branding details

Modern report designs in Microsoft Dynamics 365 for Finance and Operations .\ The logos, color schemes, and notes are setup in "Organization administration">"Setup">"Document branding">"Branding details".

Box 2: Business document management

Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents

might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.

Note:

Business users use the Electronic reporting (ER) framework to configure formats for outbound documents in accordance with the legal requirements of various countries/regions. Users can also define the dataflow to specify what application

data is placed in generated documents. The ER framework generates outbound documents in Microsoft Office formats (Excel workbooks or Word documents) by using predefined templates.

QUESTION 4

A company plans to apply updates to a Dynamics 365 Finance environment. The environment has custom code.

You need to determine the impact of updates to the custom code.

What is the impact?

- A. Updates are runtime backward compatible only.
- B. Updates are backward compatible from both a design time and runtime perspective.
- C. Updates are design-time backward compatible only.
- D. Updates are not backward compatible from either a design-time or runtime perspective.

Correct Answer: B

QUESTION 5

A company is moving financial workloads to Dynamics 365 Finance.

Balance sheet accounts do not require department dimension postings while profit and loss accounts require department dimensions.

You need to determine which functionality achieves the goal.

What should you recommend?

- A. Legal entities
- B. Financial dimensions
- C. Account structures
- D. Financial dimension sets

Correct Answer: C
