QUESTION 1

You need to recommend an appropriate implementation methodology. Which methodology should you recommend?

A. Spiral

B. Lean

C. Waterfall

D. Agile

Correct Answer: D

QUESTION 2

DRAG DROP

An organization is implementing Dynamics 365 Finance.

You need to assign security roles.

Which tools should you use? To answer, drag the appropriate tools to the correct tasks. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Correct Answer:

---

QUESTION 4

A company uses Dynamics 365 Supply Chain Management. The company has offices in several geographic regions.

Users must only be allowed to access the system from IP addresses that are associated with the regions where the company has offices.

You need to set up security for the company.

What should you set up?

A. Enable Session management

B. Azure Active Directory Conditional Access

C. Extensible Data Security policies (XDS)

D. Security policy

E. Assign user roles

Correct Answer: B

You can limit access to users with block access by location to reduce unauthorized access. By using Conditional Access policies, you can apply the right access controls when needed to help keep your organization secure and stay out of your user\'s way when not needed. Conditional Access analyses signals such as user, device, and location to automate decisions and enforce organizational access policies for resources.

For example, when location restrictions are set in a user\'s profile and the user tries to sign in from a blocked location, access to customer engagement apps (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field Service, Dynamics 365 Marketing, Dynamics 365 Project Service Automation), and Finance and Operations apps are denied.

QUESTION 5

HOTSPOT

A distribution center uses Dynamics 365 Supply Chain Management.

When product returns are received at the distribution center, they are inspected, and a replacement is sent to the customer. Customer service processes both the return receipts and replacement orders to speed up the process.

The system must be able to prevent a single user from completing an entire return process.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Scenario	Recommendation
The ability to process the receipt of the returned product.	▼ Field security Security role Segregation of duties rule
The ability to issue the shipment advice of the replacement product.	▼ Field security Security role Segregation of duties rule
The ability to prevent the assignment of the permission to issue a customer credit.	▼ Field security Security role Segregation of duties rule

Correct Answer:

Answer Area

Scenario	Recommendation
The ability to process the receipt of the returned product.	▼ Field security Security role **Segregation of duties rule**
The ability to issue the shipment advice of the replacement product.	▼ Field security Security role **Segregation of duties rule**
The ability to prevent the assignment of the permission to issue a customer credit.	▼ Field security **Security role** Segregation of duties rule
