QUESTION 1

Your company has several warehouses assigned to different sites in Microsoft Dynamics AX 2009. One production line will be shut down and its associated warehouse will be used for production from another site.

How can you assign the warehouse to a different site in Microsoft Dynamics AX 2009? Choose the 3 that apply.

- A. Create a new warehouse assigned to the new site and begin using the new warehouse to store items.
- B. Create a new warehouse assigned to the new site and transfer items from the existing warehouse.
- C. Create a new warehouse assigned to the new site and delete the old existing warehouse.
- D. Change the warehouse assignment from one site to another.

Correct Answer: ABC

QUESTION 2

What describes the difference between Master planning and Forecast planning in Microsoft Dynamics AX 2009?

- A. The Master planning module only works with Master planning and will support Forecast planning in a later release.
- B. Master planning is an integral part of the Accounts receivable and Accounts payable modules, while Forecast planning is integrated with the Production module.
- C. Master planning is usually a short-term plan, referred to as net requirement. Forecast planning is typically a long term plan based on estimates.
- D. Master planning is used for Operation scheduling and Forecast planning is used for Job scheduling.

Correct Answer: C

QUESTION 3

When you manufacture prototypes, it is desirable to have all ledger transactions posted to separate ledger accounts specifically created for prototype accounting.

Which of the following accomplishes this with the fewest new settings?

- A. Keep a log of used voucher numbers in the prototypes.
- B. Create an item group for prototype items with separate accounts and set up cost categories for the work centers.
- C. Create production groups with separate accounts for prototype production orders.
- D. Create special journals with separate ledger accounts for posting the prototype productions.

Correct Answer: C

QUESTION 4

Which of the following is the most accurate way to describe the work center structure in Microsoft Dynamics AX 2009?

- A. The company's work centers are divided into two levels, with the higher level being routing groups and the lower level being cost categories.
- B. The company's work centers are defined hierarchically, with an unlimited number of levels.
- C. The company's work centers are divided into two levels consisting of work center groups and work centers.
- D. The work center definitions in Microsoft Dynamics AX are composed of three tiers, work center groups, work centers and sub-contractor work centers.

Correct Answer: C

QUESTION 5
