QUESTION 1

In the Master scheduling process, Microsoft Dynamics AX 2009 can generate several different proposals for changes to planned and existing orders to optimize inventory issues and receipts.

What are the proposals called?

- A. Future messages
- B. Action messages
- C. Derived messages
- D. Net requirements

Correct Answer: B

QUESTION 2

A user creates a purchase order to fulfill a sales order and sets the update marking to "no". The delivery day for the purchase order and the sales order match each other. The purchase order is then delayed two days, which the user updated on the purchase order. Later, the user performs Master scheduling and creates a planned purchase order to fulfill the sales order with the same delivery date as the sales order.

Why is the planned order created?

- A. Negative days is below two days.
- B. Positive days is below two days.
- C. Negative time fence is below two days.
- D. Planned order time fence is below two days.

Correct Answer: A

QUESTION 3

Which of the following is the most accurate way to describe the work center structure in Microsoft Dynamics AX 2009?

- A. The company's work centers are divided into two levels, with the higher level being routing groups and the lower level being cost categories.
- B. The company's work centers are defined hierarchically, with an unlimited number of levels.
- C. The company's work centers are divided into two levels consisting of work center groups and work centers.

D. The work center definitions in Microsoft Dynamics AX are composed of three tiers, work center groups, work centers and sub-contractor work centers.

Correct Answer: C

QUESTION 4

When can a production order be split?

- A. It can only be split when its status is Created.
- B. It can be split up until the total scheduled quantity is started.
- C. It can be split once and this must be done prior to Job scheduling.
- D. It can be split once and this must be done prior to Operation scheduling.

Correct Answer: B

QUESTION 5

During scheduling, which method will account for the extra use of capacity due to material scrapped, without producing or consuming extra items?

- A. Set up a scrap percentage in the route.
- B. Set up a higher consumption of materials on the production BOM.
- C. Set up a scrap type on the production BOM.
- D. Start a greater quantity corresponding to the yield

Correct Answer: A
