### QUESTION 1

During scheduling, which method will account for the extra use of capacity due to material scrapped, without producing or consuming extra items?

- A. Set up a scrap percentage in the route.
- B. Set up a higher consumption of materials on the production BOM.
- C. Set up a scrap type on the production BOM.
- D. Start a greater quantity corresponding to the yield

Correct Answer: A

---

### QUESTION 2

What describes the difference between Master planning and Forecast planning in Microsoft Dynamics AX 2009?

- A. The Master planning module only works with Master planning and will support Forecast planning in a later release.
- B. Master planning is an integral part of the Accounts receivable and Accounts payable modules, while Forecast planning is integrated with the Production module.
- C. Master planning is usually a short-term plan, referred to as net requirement. Forecast planning is typically a long term plan based on estimates.
- D. Master planning is used for Operation scheduling and Forecast planning is used for Job scheduling.

Correct Answer: C

---

### QUESTION 3

When can a production order be split?

- A. It can only be split when its status is Created.
- B. It can be split up until the total scheduled quantity is started.
- C. It can be split once and this must be done prior to Job scheduling.
- D. It can be split once and this must be done prior to Operation scheduling.

Correct Answer: B

---

### QUESTION 4

There are 100 units of an item on hand. A user enters a sales order for 40 units with a delivery date in 20 days.

Why would Master scheduling create a planned purchase order to cover the sale, instead of using the existing inventory?

- A. Negative days is less than 20.
- B. Positive days is less than 20.
- C. The firming time fence is less than 20.
- D. The coverage time fence is less than 20.

Correct Answer: B

---
