QUESTION 1

Why do you set the permissions property on a report?

A. To allow users to run the report.

B. To add that report to your customer license in cases where the license does not include it.

C. To prevent users from running the report.

D. In cases where the report modifies a protected table.

Correct Answer: D

QUESTION 2

To cause the data entered on a Request Options form of a Microsoft Dynamics NAV report to be saved after the report is run, which of the following properties must be set to Yes?

A. SetZup

B. SaveValues

C. SaveData

D. SaveOnExit

Correct Answer: B

QUESTION 3

A Binary operator is an operator that:

A. Serves two purposes.

B. Acts upon both the term before it and the term after it.

C. Acts upon any term to convert it into a binary value.

D. Can be used to work twice in the same expression.

Correct Answer: B

QUESTION 4

The main limitation of dataports as a tool to integrate Microsoft Dynamics NAV with an outside application is that it requires the outside application to:

A. Initiate all data transfers from itself to Microsoft Dynamics NAV by running the dataport.

B. Be certified as Microsoft Dynamics NAV Compliant.

C. Place its data into an ASCII file before the Microsoft Dynamics NAV dataport can read it.

D. Know the internal data structure of the Microsoft Dynamics NAV tables to be updated by the dataport.

Correct Answer: C

QUESTION 5

In a Microsoft Dynamics NAV report with Customer and Cust. Ledger Entry as data items and Cust. Ledger Entry indented under Customer, which of the following is the easiest way to filter both tables to the same date range?

A. Use the SETRANGE command on both tables in the OnPreReport trigger of the report.

B. Add Date Filter to the ReqFilterFields property of the Customer data item and link the Posting Date field of the Cust. Ledger Entry data item to the Date Filter field of the Customer table, using the DataItemLink property.

C. Add Date Filter to the ReqFilterFields property of the Customer data item and use the SETFILTER command to filter the Posting Date field of the Cust. Ledger Entry table.

D. Use the SETFILTER command on both tables in the OnPreDataItem trigger of the Customer data item.

Correct Answer: B
