## QUESTION 1

### DRAG DROP

You have a computer that runs Windows 11 and has Windows Sandbox enabled.

You need to configure a Windows Sandbox environment. The solution must meet the following requirements:

1.

Support a virtual GPU.

2.

Mount the C:\Temp folder as read only.

3.

Prevent users from copying files to the sandbox by using the clipboard.

How should you complete the configuration file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

### QUESTION 4

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).

You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer.

What should you do?

- A. From PowerShell. run the Gec-GPO cmdlet.
- B. From PowerShell. run the Gec-GPOReport cmdlet.
- C. From Microsoft Edge, open edge://policy.
- D. From Microsoft Edge, open edge://settings.

Correct Answer: C

The Get-GPOReport cmdlet would generate a report for all domain group policy objects. However, this would not display the settings that are applied by local group policy objects. To display the settings applied by both domain and local GPOs, you would have to open Microsoft Edge and enter edge://policy in the address bar.
