## QUESTION 1

Which users can purchase and assign App1?

- A. User3 only
- B. User1 and User3 only
- C. User1, User2, User3, and User4
- D. User1, User3, and User4 only
- E. User3 and User4 only

Correct Answer: C

Global Administrator and Billing Administrator - IT Pros with these accounts have full access to Microsoft Store. They can do everything allowed in the Microsoft Store Admin role, plus they can sign up for Microsoft Store.

<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>

<https://docs.microsoft.com/en-us/microsoft-store/assign-apps-to-employees>

---

## QUESTION 2

You have a shared computer that runs Windows 10.

The computer is infected with a virus.

You discover that a malicious TTF font was used to compromise the computer.

You need to prevent this type of threat from affecting the computer in the future.

What should you use?

- A. Windows Defender Exploit Guard
- B. Windows Defender Application Guard
- C. Windows Defender Credential Guard
- D. Windows Defender System Guard
- E. Windows Defender SmartScreen

Correct Answer: A

Exploit protection helps protect against malware that uses exploits to infect devices and spread. Exploit protection consists of many mitigations that can be applied to either the operating system or individual apps.

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/exploit-protection>

---

## QUESTION 3

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices.

You need to enable Enhanced jailbreak detection.

What should you configure?

- A. the device compliance policy
- B. the Compliance policy settings
- C. a network location
- D. a configuration profile

Correct Answer: B

There are two parts to compliance policies in Intune: Compliance policy settings and Device compliance policy.

Under "Compliance Policy Settings" itself, you can find the setting "Enhanced Jailbreak Detection (applies only to iOS/iPadOS)"

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

Answer B. Compliance policy settings These settings are generic and define the default behavior of the compliance policy. Here you can define what happens with a device which has no compliance policy assigned, by default this device will be marked as "Not Compliant". You can also configure the usage of "Enhanced jailbreak detection" which is only supported on iOS/iPadOS and uses location services to more regularly check for a jailbreak.

---

## QUESTION 4

### HOTSPOT

You have a Microsoft 365 subscription that uses Microsoft Intune and contains 100 Windows 10 devices.

You need to create Intune configuration profiles to perform the following actions on the devices:

1.  
Deploy a custom Start layout.
2.  
Rename the local Administrator account.

Which profile template should you use for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

## Answer Area

Deploy a custom Start layout:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

Rename the local Administrator account:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

Correct Answer:

## Answer Area

Deploy a custom Start layout:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

Rename the local Administrator account:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

Box 1: Device restriction

Customize Start Menu Custom and Taskbar

Here is a quick step-by-step guide to help you to deploy the prepared XML file. This Intune policy helps to customize the start menu and taskbar for Windows 10 devices.

Logon to Microsoft Endpoint Manager Portal.

Navigate to Devices -> Windows -> Configuration Profiles.

Select Platform -> Windows 10 and later.

Select Profile Type -> Template.

Search with device and select Device Restrictions.

Click on Create button.

Box 2: Identity protection Use an Identity protection profile to manage Windows Hello for Business on groups of devices in Microsoft Intune. Windows Hello for Business is a method for signing in to Windows devices by replacing passwords, smart cards, and virtual

smart cards. Intune includes built-in settings so Administrators can configure and use Windows Hello for Business.

Incorrect:

\*

Delivery Optimization settings for your Windows devices to reduce bandwidth consumption when those devices download applications and updates. Configure Delivery Optimization as part of your device configuration profiles.

\*

With Intune, you can use device configuration profiles to manage common Endpoint protection security features on devices, including:

Firewall

BitLocker

Allowing and blocking apps Microsoft Defender and encryption

For example, you can create an Endpoint protection profile that only allows macOS users to install apps from the Mac App Store. Or, enable Windows

SmartScreen when running apps on Windows 10/11 devices.

## QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup.

You need to enroll Computer1 in Intune.

Solution: From Computer1, you sign in to <https://portal.manage.microsoft.com> and use the Devices tab.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

The Company Portal apps, Company Portal website, and Intune app on Android are where users access company data and can do common tasks. Common task may include enrolling devices, installing apps, and locating information (such as for assistance from your IT department).
