QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Autopilot to configure the computer settings of computers issued to users.

A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company.

You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot user-driven deployment profile.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

Windows Autopilot user-driven mode lets you configure new Windows devices to automatically transform them from their factory state to a ready-to-use state. This process doesn't require that IT personnel touch the device.

The process is very simple. Devices can be shipped or distributed to the end user directly with the following instructions:

Unbox the device, plug it in, and turn it on.

Choose a language (only required when multiple languages are installed), locale, and keyboard.

Connect it to a wireless or wired network with internet access. If using wireless, the user must establish the Wi-Fi link.

Specify your e-mail address and password for your organization account.

The rest of the process is automated. The device will:

Join the organization.

Enroll in Intune (or another MDM service)

Get configured as defined by the organization.

QUESTION 2

DRAG DROP

Your company uses Microsoft Intune. You have a Microsoft Store for Business account.

You need to ensure that you can deploy Microsoft Store for Business apps by using Intune.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions		Answer Area
From Intune, enable Microsoft Store for Business.		
From Microsoft Store for Business, assign apps to people.		
From Intune, sync Microsoft Store for Business.		
From Intune, create an app configuration policy.		
From Microsoft Store for Business, add a management tool.		

Correct Answer:

Actions	Answer Area
From Intune, enable Microsoft Store for Business.	From Microsoft Store for Business, add a management tool.
	From Microsoft Store for Business, assign apps to people.
	From Intune, sync Microsoft Store for Business.
From Intune, create an app configuration policy.

QUESTION 3

You are currently making use of the Antimalware Assessment solution in Microsoft Azure Log Analytics.

You have accessed the Protection Status dashboard and find that there is a device that has no real time protection.

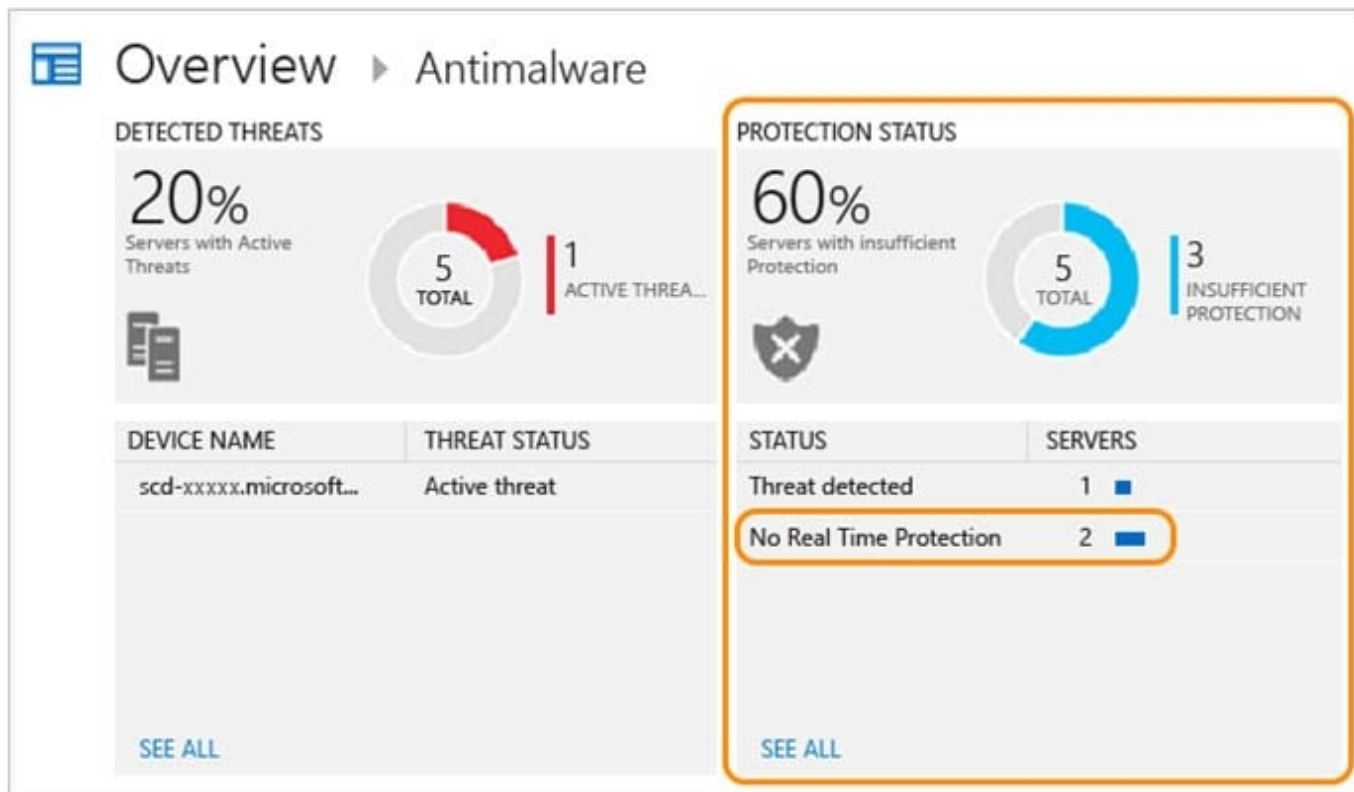

Which of the following could be a reason for this occurring?

- A. Windows Defender has been disabled.
- B. You need to install the Azure Diagnostic extension.
- C. Windows Defender Credential Guard is incorrectly configured.
- D. Windows Defender System Guard is incorrectly configured.

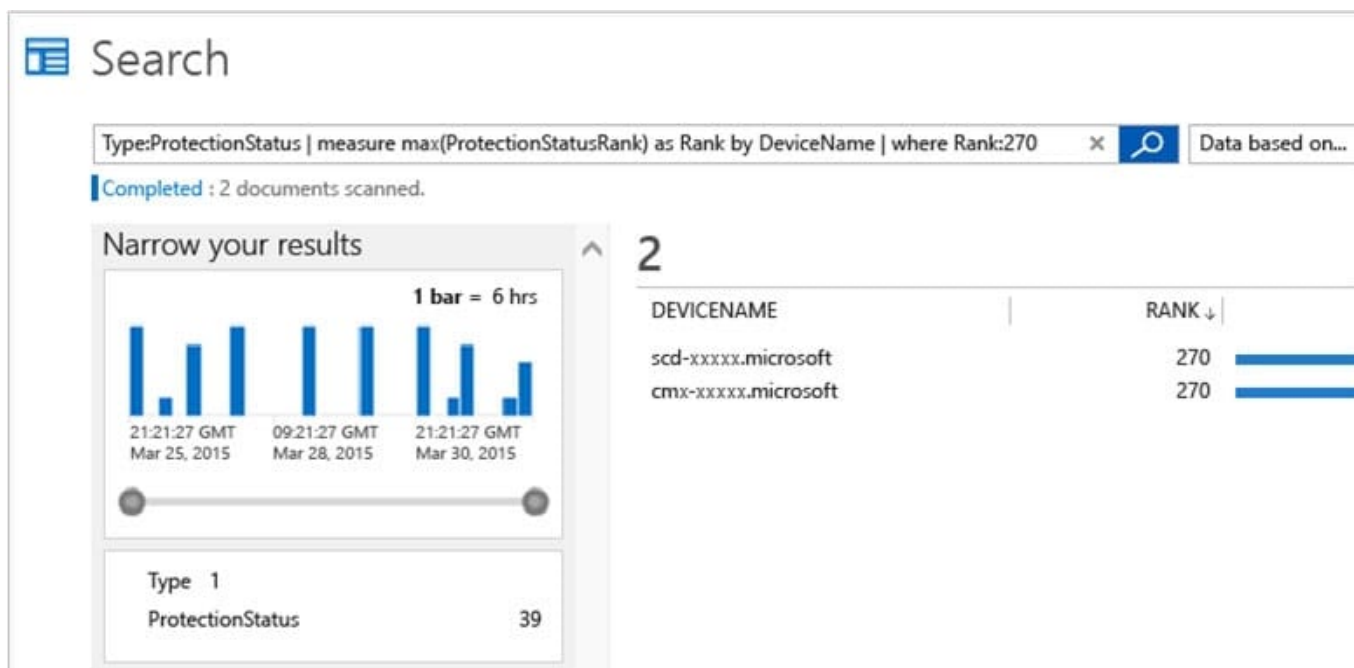

Correct Answer: A

Microsoft Defender Antivirus is usually the primary antivirus/antimalware product on your device. To review protection status

1. On the Antimalware dashboard, you will review the Protection Status blade and click no real time protection.

2. Search shows a list of servers without protection.

3. At this point you now know what servers do not have realtime protection.

Computers that do not have System Center Endpoint Protection installed (or if SCEP is not detected) will be reported as no real time protection.

QUESTION 4

You manage one hundred Microsoft Azure Active Directory (Azure AD) joined Windows 10 devices.

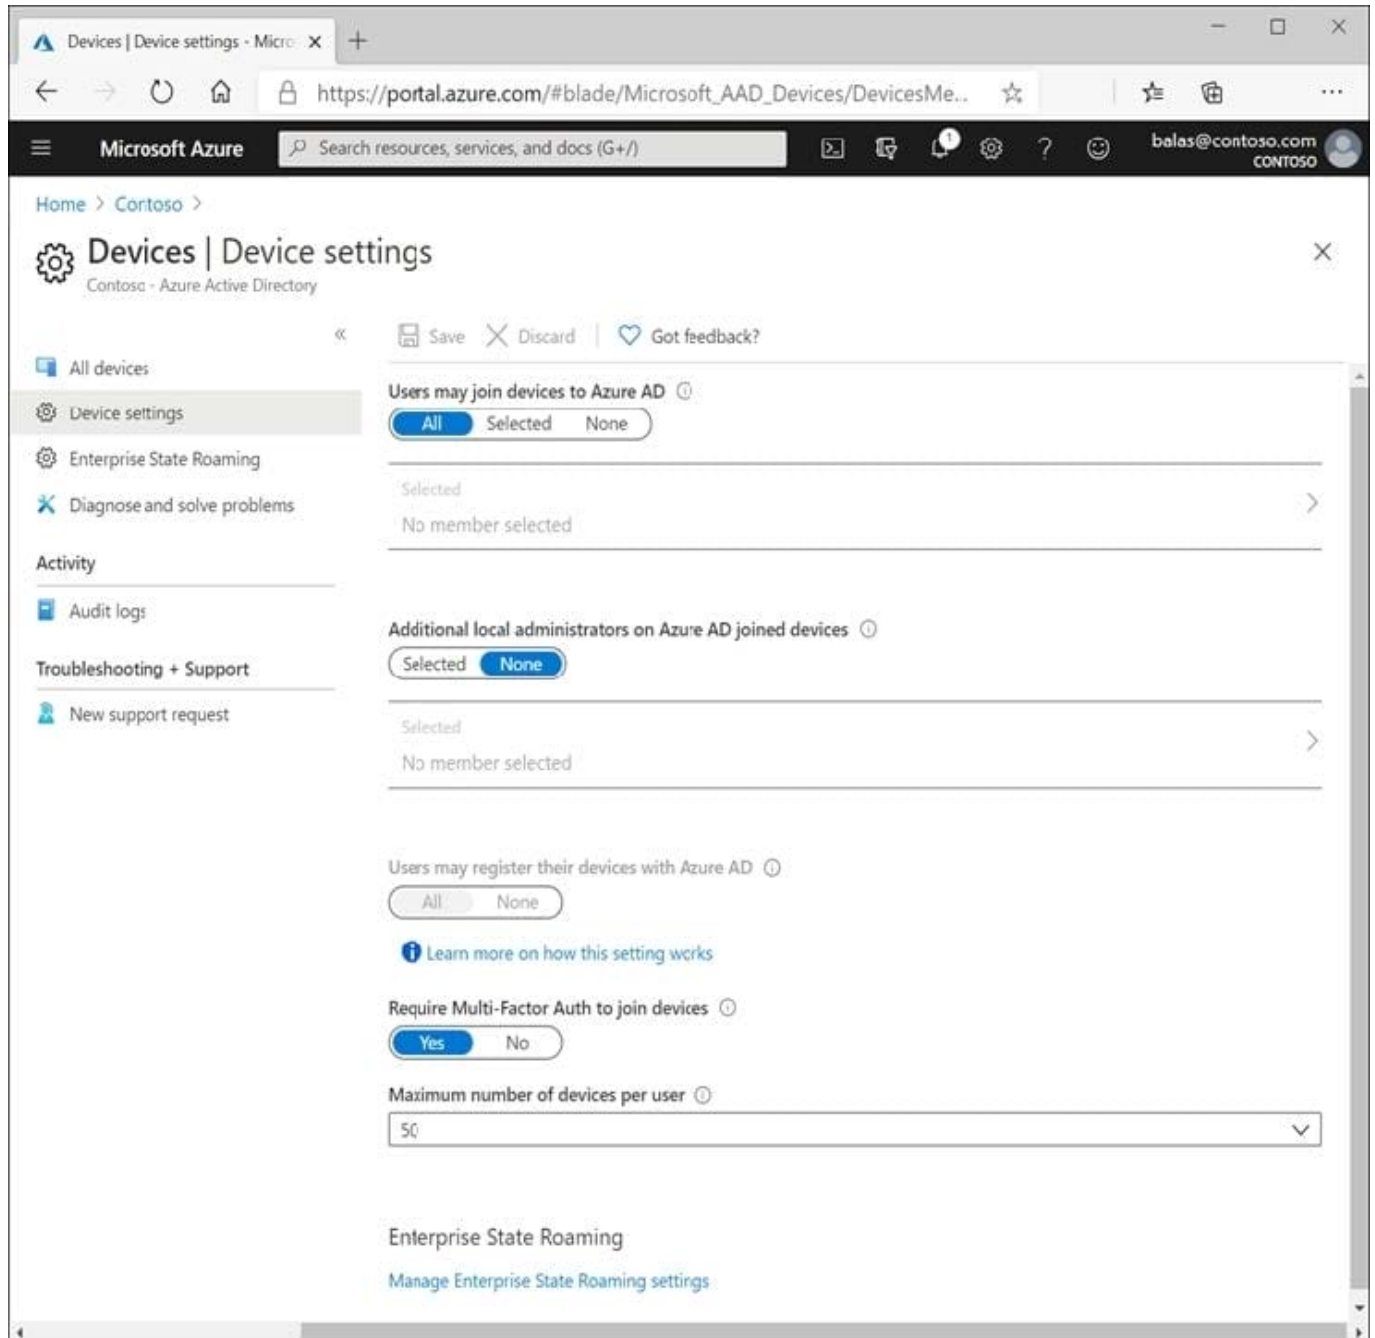

You want to make sure that users are unable to join their home PC\\s to Azure AD.

Which of the following actions should you take?

- A. You should configure the Enrollment restriction settings via the Device enrollment blade in the Intune admin center.
- B. You should configure the Enrollment restriction settings via the Security and Compliance admin center.
- C. You should configure the Enrollment restriction settings via the Azure Active Directory admin center.
- D. You should configure the Enrollment restriction settings via the Windows Defender Security Center.

Correct Answer: C

Azure Active Directory (Azure AD) provides a central place to manage device identities and monitor related event information. Configure device settings.

* Users may join devices to Azure AD: This setting enables you to select the users who can register their devices as Azure AD joined devices. The default is All.

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/devices/device-management-azure-portal>

QUESTION 5

Which users can purchase and assign App1?

- A. User3 only
- B. User1 and User3 only

C. User1, User2, User3, and User4

D. User1, User3, and User4 only

E. User3 and User4 only

Correct Answer: C

Global Administrator and Billing Administrator - IT Pros with these accounts have full access to Microsoft Store. They can do everything allowed in the Microsoft Store Admin role, plus they can sign up for Microsoft Store.
