QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	Fabrikam.com

The domain syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit.

PROVISION FROM ACTIVE DIRECTORY

Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

Manage provisioning (Preview)

Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Enabled

USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com.

You need to ensure that User2 can access the resources in Azure AD.

Solution: From the on-premises Active Directory domain, you set the UPN suffix for User2 to @contoso.com. You instruct User2 to sign in as user2@contoso.com.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

The on-premises Active Directory domain is named contoso.com. You can enable users to sign on using a different UPN (different domain), by adding the domain to Microsoft 365 as a custom domain. Alternatively, you can configure the user account to use the existing domain (contoso.com).

QUESTION 2

Your company has 3.000 users all the assigned Microsoft 365 E3 licenses.

Some users are assigned for all Microsoft365 services, Other users are assigned licensees for only certain Microsoft 365 services.

You need to determine whether a user named User1 is licensed for Exchange Online only.

Solution: You launch the Microsoft 365 admin center, and then review the Active users blade.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 3

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
Admin1	Application administrator
Admin2	Office apps administrator
Admin3	Windows 365 Administrator
Admin4	Security administrator

From the Microsoft 365 Apps admin center, you create a deployment configuration.

Which users can download the deployment configuration file from the Microsoft 365 Apps admin center?

A. Admin2 only

B. Admin2 and Admin3 only

C. Admin2 and Admin4 only

D. Admin1, Admin2, and Admin4 only

E. Admin1, Admin2, Admin3, and Admin4

Correct Answer: C

How to get to the admin center

Sign in at config.office.com with your admin account. To sign into the admin center, your account must have either the global administrator, security administrator (Admin4), or Office apps administrator (Admin2) role.

QUESTION 4

HOTSPOT

Your network contains an on-premises Active Directory domain named contoso.com.

Your company purchases a Microsoft 365 subscription and establishes a hybrid deployment of Azure Active Directory (Azure AD) by using password hash synchronization.

You create a new user named User10 on-premises and a new user named User20 in Azure AD.
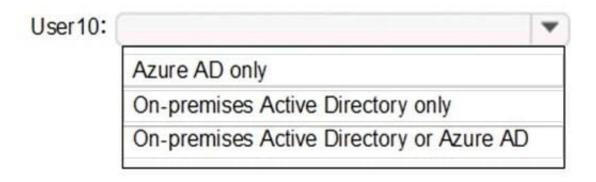

You need to identify where an administrator can reset the password of each new user.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
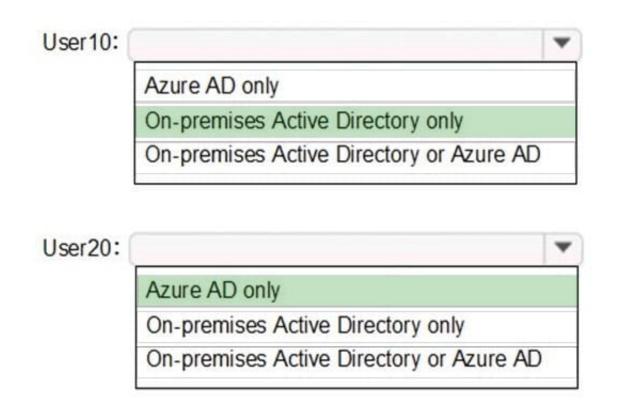

Hot Area:

Answer Area

User10:

| Azure AD only |
| On-premises Active Directory only |
| On-premises Active Directory or Azure AD |

User20:

| Azure AD only |
| On-premises Active Directory only |
| On-premises Active Directory or Azure AD |

Correct Answer:

Answer Area

User10:

- Azure AD only
- **On-premises Active Directory only**
- On-premises Active Directory or Azure AD

User20:

- **Azure AD only**
- On-premises Active Directory only
- On-premises Active Directory or Azure AD

If a user account is created in the on-premise Active Directory and synchronized to Azure Active Directory, you can reset the password of the user account in the on-premise Active Directory only. If a user account is created in Azure Active Directory, you can reset the password of the user account in the Azure Active Directory only.

QUESTION 5

You need to consider the underlined segment to establish whether it is accurate.

Your company has deployed a Microsoft 365 tenant and to implemented multi-factor authentication.

They have four offices, of which one houses the RandD department. You have been asked to make sure that multi-factor authentication is compulsory only for users in the office houses the RandD department.

You create a conditional access policy.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required

B. password protection

C. DLP

D. label

Correct Answer: A
