QUESTION 1

You have a Microsoft 365 E5 subscription.

All users have Mac computers. All the computers are enrolled in Microsoft Endpoint Manager and onboarded to Microsoft Defender Advanced Threat Protection (Microsoft Defender ATP).

You need to configure Microsoft Defender ATP on the computers.

What should you create from the Endpoint Management admin center?

- A. a Microsoft Defender ATP baseline profile
- B. a device configuration profile
- C. an update policy for iOS
- D. a mobile device management (MDM) security baseline profile

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/advanced-threat-protection-configure>

QUESTION 2

Your company has multiple offices.

You have a Microsoft 365 E5 tenant that uses Microsoft Intune for device management. Each office has a local administrator.

You need to ensure that the local administrators can manage only the devices in their respective office.

What should you use?

- A. scope tags
- B. configuration profiles
- C. device categories
- D. conditional access policies

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/mem/intune/fundamentals/scope-tags>

QUESTION 3

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You have a Microsoft 365 E3 subscription that includes Windows 10 Pro Microsoft Azure Active Directory (Azure AD) joined devices.

You have been tasked with upgrading the edition of the Windows 10 devices to Enterprise. Your strategy should allow for the upgrade to occur upon the users\' next sign-in, with minimum interruption for the users.

Solution: You make use of Windows Autopilot to achieve your goal.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

References: <https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure pilot co-management.

You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.

Solution: You add Device1 to a Configuration Manager device collection.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 5

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

Your company implements Windows Information Protection (WIP).

You need to modify which users and applications are affected by WIP.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

	User1
Set-AdminAuditLogConfig	
Set-Mailbox	
Set-UnifiedAuditSetting	

	\$true
-AdminAuditLogEnabled	
-AuditEnabled	
-UnifiedAuditLogIngestionEnabled	

Correct Answer:

Set-AdminAuditLogConfig
Set-Mailbox
Set-UnifiedAuditSetting

User1

-AdminAuditLogEnabled
-AuditEnabled
-UnifiedAuditLogIngestionEnabled

\$true
