QUESTION 2

HOTSPOT

After you deploy the Exchange organization, you run the Get-ActiveSyncDeviceAccessRule cmdlet, and you receive the following output.

```
QueryString           : Outlook
Name                   : Outlook (DeviceType)
Characteristic         : DeviceType
AccessLevel            : Block
Identity               : Outlook (DeviceType)
ObjectClass            : {top, msExchDeviceAccessRule}
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Correct Answer:

Answer Area

Statements	Yes	No
The device requirements for the iOS devices are met.	<input type="radio"/>	<input checked="" type="radio"/>
The device requirements for the Android devices are met.	<input type="radio"/>	<input checked="" type="radio"/>
The device requirements for the Windows 10 tablets are met.	<input checked="" type="radio"/>	<input type="radio"/>

The rule is incorrectly configured so nothing will be blocked. The QueryString parameter specifies the device identifier that's used by the rule, not the software.
