QUESTION 1

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins_Brussels, RegionalAdmins_Munich,

RegionalAdmins_London, RegionalAdmins_Vienna and RegionalAdmins_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport

department connect to network resources by using a connection in the main office.

Requirements

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

Technical Requirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without end-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problem statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to recommend a procedure for closing the Brussels office that meets the technical requirements.

What should you recommend?

A. In the main office, deploy an Exchange Server 2016 server that has the Unified Messaging role installed, and then move the mailboxes from the Brussels office to the new server.

B. Deploy a Microsoft Skype for Business 2019 server to the main office, and then move the mailboxes from the Brussels office to an Exchange Server 2019 server in the main office.

C. Implement a new mailbox database on an Exchange Server 2019 server in the main office, and then move the

mailboxes from the Brussels office to the new mailbox database.

D. Implement a new database availability group (DAG) that contains the server in the Brussels office and a new Exchange Server 2019 server in the main office, and then create a mailbox database copy on the new server in the main office.

Correct Answer: C

QUESTION 2

HOTSPOT

You have a Microsoft Exchange Server 2019 hybrid deployment. You are migrating mailboxes from the on-premises organization to Exchange Online. From the Exchange admin center, you create a new migration batch that includes 25 mailboxes, and then select Manual Complete the batch.

Later, you must complete the migration of a mailbox named user1@litware.com in the batch as soon as possible. You discover that the status of the migration batch is Syncing, but the status of the move request for user1@litware.com is Synced.

You need to complete the migration of the user1@litware.com mailbox to Exchange Online as soon as possible.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

The screenshot shows a command prompt with the following text: `Resume-Moverquest -Identity 'user1@litware.com'`. To the left of the command is a dropdown menu with three options: `Set-MoveRequest`, `Set-MigrationBatch`, and `Set-MigrationConfig`. To the right of the command is another dropdown menu with three options: `-CompleteAfter (Get-Date)`, `-SuspendWhenReadyToComplete $false`, and `-PreventCompetition $false`. A diagonal watermark for www.lead4pass.com is visible across the image.

Correct Answer:

The screenshot shows the same command prompt as above, but with the correct options selected. In the left dropdown menu, `Set-MoveRequest` is highlighted in green. In the right dropdown menu, `-PreventCompetition $false` is highlighted in green. The diagonal watermark for www.lead4pass.com is still visible.

QUESTION 3

HOTSPOT

You have a Microsoft Exchange Server 2019 organization. You run the commands shown in the following exhibit.

```
[PS] C:\> New-ThrottlingPolicy -Name TP1 -PowerShellMaxOperations 10 -
PowerShellMaxCmdlets 6 -ExchangeMaxCmdlets 5 -
PowerShellMaxCmdletsTimerPeriod 10
```

Name	ThrottlingPolicyScope	IsServiceAccount
TP1	Regular	False

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

TP1 will apply to [answer choice].

- all users in the organization
- specific users only
- mail-enabled groups only

If TP1 applies to User1, and User1 exceeds the limit, [answer choice].

- all cmdlets will fail
- all cmdlets will slow down
- only cmdlets over the limit will fail
- only cmdlets over the limit will show down

Correct Answer:

TP1 will apply to [answer choice].

all users in the organization
specific users only
mail-enabled groups only

If TP1 applies to User1, and User1 exceeds the limit, [answer choice].

all cmdlets will fail
all cmdlets will slow down
only cmdlets over the limit will fail
only cmdlets over the limit will show down

QUESTION 4

Your company has a Microsoft Exchange Server 2019 organization that contains two servers in a database availability group (DAG).

The customer service department at the company uses public folders to receive customer communications. Only users in the customer service department can read items in the folders.

For a new customer, you create a mail-enabled public folder that has the default settings.

The customer reports that when she sends an email message to the email address of the public folder, she receives a non-delivery report (NDR).

You need to ensure that the public folder can receive email.

- A. Grant the Author permission to the Default group
- B. Grant the Create items permission to the Default group
- C. Grant the Author permission to the Anonymous group
- D. Grant the Create items permission to the Anonymous group

Correct Answer: D

References: <https://docs.microsoft.com/en-us/exchange/collaboration/public-folders/mail-enable-or-disable?view=exchserver-2019#allow-anonymous-users-to-send-email-to-a-mail-enabled-public-folder>

QUESTION 5

HOTSPOT

You have a Microsoft Exchange Server 2019 organization that uses a namespace of contoso.com. Email address

policies for contoso.com are configured as shown in the Address Policies exhibit.

(Click the Address Policies tab.)

Address Policies

Name	PRIORITY	STATUS
Marketing	1	Applied
Sales	2	Applied
Default Policy	Lowest	Applied

The Marketing email address policy is shown in the Marketing Policy exhibit. (Click the Marketing Policy tab.)

Marketing Policy

Marketing

Email Address Format

SMTP

Primary: John.Smith@contoso.com

Address 2: John.Smith@marketing.contoso.com

Includes

Users with Exchange mailboxes,
in the following departments: Marketing

This email address policy has been applied.

The Sales email address policy is shown in the Sales Policy exhibit. (Click the Sales Policy tab.)

Sales Policy

Sales

Email Address Format

SMTP

Primary: %1g.%@contoso.com

Includes

Users with Exchange mailboxes,
in the following departments: Sales

This email address policy has been applied.

For each of the following statements, select Yes if the statement is true. otherwise, select No.

Hot Area:

Statements	Yes	No
The user mailboxes of the marketing department will have an additional email address that uses a SMTP suffix of @marketing.contoso.com	<input type="radio"/>	<input type="radio"/>
The user mailbox of a sales department user named Ben Smith will have an email address of b.smith@contoso.com	<input type="radio"/>	<input type="radio"/>
All user mailboxes will have an email address in the firstname.lastname@contoso.com format.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
The user mailboxes of the marketing department will have an additional email address that uses a SMTP suffix of @marketing.contoso.com	<input checked="" type="checkbox"/>	<input type="checkbox"/>
The user mailbox of a sales department user named Ben Smith will have an email address of b.smith@contoso.com	<input type="checkbox"/>	<input checked="" type="checkbox"/>
All user mailboxes will have an email address in the firstname.lastname@contoso.com format.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
