QUESTION 1

Case Study : Litware,Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins_Brussels, RegionalAdmins_Munich,

RegionalAdmins_London, RegionalAdmins_Vienna and RegionalAdmins_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport

department connect to network resources by using a connection in the main office.

Requirements

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

TechnicalRequirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without and-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problemstatements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to configure the required objects for the branch office administrators.

What should you create for each administrator?

A. a management role assignment policy and a management role group

B. a management role scope and a management role assignment

C. a management role scope and a managent role group

D. a management role and a management role assignment policy

Correct Answer: C

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization.

You discover that users rarely delete items from their Sent Items folder and their Deleted Items folder.

You need to recommend a solution to automatically reduce the size on the primary mailbox of each user.

Solution: You recommend creating an archive mailbox for each user and configuring a retention policy that moves items to the archive mailbox.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 3

Your network contains an Active Directory domain named fabrikam.com.

You have a Microsoft Exchange Server 2019 organization that contains two Mailbox servers in a database availability group (DAG).

You plan to implement a hybrid deployment by using the Exchange Modern Hybrid connection option.

Which three configurations will be transferred automatically from the on-premises organizations to Exchange Online? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. the device access rules

B. the address lists

C. the address book policies (ABPs)

D. the Messaging Records Management (MRM) settings

E. the mail flow rules

Correct Answer: ABE

QUESTION 4

DRAG DROP

Your company named ADatum Corporation has a Microsoft 365 subscription.

ADatum acquires a company named Contoso, Ltd.

In the subscription, you create a new mailbox for each user at Contoso. You need to provide the Contoso users with a global address list (GAL) that contains only their email addresses.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create an address book policy (ABP) named Contoso-AB that uses the GAL.

Create a new set of address lists for the Contoso users.

Create an address book policy (ABP) named Contoso-AB that uses the new set of address lists.

Create a new GAL named Contoso GAL.

Assign Contoso-AB to all the mailboxes of the Contoso users.

Answer Area

Correct Answer:

Actions	Answer Area
	Create a new GAL named Contoso GAL.
Create a new set of address lists for the Contoso users	Create an address book policy (ABP) named Contoso-AB that uses the GAL.
Create an address book policy (ABP) named Contoso that uses the new set of address lists.	Assign Contoso-AB to all the mailboxes of the Contoso users.

Answer Area

Create a new GAL named Contoso GAL.

Create an address book policy (ABP) named Contoso-AB that uses the GAL.

Assign Contoso-AB to all the mailboxes of the Contoso users.

QUESTION 5

You have a Microsoft Exchange Server 2019 organization.

You plan to enable journaling for external email messages only.

You need to ensure that journal reports are delivered if the journal mailbox is offline.

What should you do?

A. Create a new journal rule.

B. Run Set-TransportService and extend MessageExpirationTimeout.

C. Edit the journal rule to include all messages.

D. Specify an alternative journaling mailbox.

Correct Answer: D
